CAUTIONARY STATEMENTS RELEVANT TO FORWARD-LOOKING INFORMATION FOR THE PURPOSE OF "SAFE HARBOR" PROVISIONS OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

This quarterly report on Form 10-Q of Chevron Corporation contains forward-looking statements relating to Chevron's operations and energy transition plans that are based on management's current expectations, estimates and projections about the petroleum, chemicals and other energy-related industries. Words or phrases such as "anticipates," "expects," "intends," "plans," "targets," "advances," "commits," "drives," "aims," "forecasts," "projects," "believes," "approaches," "seeks," "schedules," "estimates," "positions," "pursues," "may," "can," "could," "should," "will," "budgets," "outlook," "trends," "guidance," "focus," "on track," "goals," "objectives," "strategies," "opportunities," "poised," "potential," "ambitions," "aspires" and similar expressions are intended to identify such forward-looking statements. These statements are not guarantees of future performance and are subject to certain risks, uncertainties and other factors, many of which are beyond the company's control and are difficult to predict. Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements. The reader should not place undue reliance on these forward-looking statements, which speak only as of the date of this report. Unless legally required, Chevron undertakes no obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise.

Among the important factors that could cause actual results to differ materially from those in the forward-looking statements are: changing crude oil and natural gas prices and demand for the company's products, and production curtailments due to market conditions; crude oil production quotas or other actions that might be imposed by the Organization of Petroleum Exporting Countries and other producing countries; technological advancements; changes to government policies in the countries in which the company operates; public health crises, such as pandemics (including coronavirus (COVID-19)) and epidemics, and any related government policies and actions; disruptions in the company's global supply chain, including supply chain constraints and escalation of the cost of goods and services; changing economic, regulatory and political environments in the various countries in which the company operates; general domestic and international economic, market and political conditions, including the military conflict between Russia and Ukraine and the global response to such conflict; changing refining, marketing and chemicals margins; actions of competitors or regulators; timing of exploration expenses; timing of crude oil liftings; the competitiveness of alternate-energy sources or product substitutes; development of large carbon capture and offset markets; the results of operations and financial condition of the company's suppliers, vendors, partners and equity affiliates, particularly during the COVID-19 pandemic; the inability or failure of the company's joint-venture partners to fund their share of operations and development activities; the potential failure to achieve expected net production from existing and future crude oil and natural gas development projects; potential delays in the development, construction or start-up of planned projects; the potential disruption or interruption of the company's operations due to war, accidents, political events, civil unrest, severe weather, cyber threats, terrorist acts, or other natural or human causes beyond the company's control; the potential liability for remedial actions or assessments under existing or future environmental regulations and litigation; significant operational, investment or product changes undertaken or required by existing or future environmental statutes and regulations, including international agreements and national or regional legislation and regulatory measures to limit or reduce greenhouse gas emissions; the potential liability resulting from pending or future litigation; the company's future acquisitions or dispositions of assets or shares or the delay or failure of such transactions to close based on required closing conditions; the potential for gains and losses from asset dispositions or impairments; government mandated sales, divestitures, recapitalizations, taxes and tax audits, tariffs, sanctions, changes in fiscal terms or restrictions on scope of company operations; foreign currency movements compared with the U.S. dollar; higher inflation and related impacts; material reductions in corporate liquidity and access to debt markets; the receipt of required Board authorizations to implement capital allocation strategies, including future stock repurchase programs and dividend payments; the effects of changed accounting rules under generally accepted accounting principles promulgated by rule-setting bodies; the company's ability to identify and mitigate the risks and hazards inherent in operating in the global energy industry; and the factors set forth under the heading "Risk Factors" on pages 20 through 25 of the company's 2021 Annual Report on Form 10-K and in subsequent filings with the U.S. Securities and Exchange Commission. Other unpredictable or unknown factors not discussed in this report could also have material adverse effects on forward-looking statements.

⁽¹⁾ Beginning and ending balances for all periods include capital in excess of par, common stock issued at par for \$1,832, and \$(240) associated with Chevron's Benefit Plan Trust. Changes reflect capital in excess of par.

⁽²⁾ Beginning and ending total issued share balances include 14,168,000 shares associated with Chevron's Benefit Plan Trust for all periods.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1. General

Basis of Presentation The accompanying consolidated financial statements of Chevron Corporation and its subsidiaries (together, Chevron or the company) have not been audited by an independent registered public accounting firm. In the opinion of the company's management, the interim data includes all adjustments necessary for a fair statement of the results for the interim periods. These adjustments were of a normal recurring nature. The results for the three- and nine-month periods ended September 30, 2022, are not necessarily indicative of future financial results. The term "earnings" is defined as net income attributable to Chevron.

Certain notes and other information have been condensed or omitted from the interim financial statements presented in this Quarterly Report on Form 10-Q. Therefore, these financial statements should be read in conjunction with the company's 2021 Annual Report on Form 10-K.

Note 2. Changes in Accumulated Other Comprehensive Losses

The change in Accumulated Other Comprehensive Losses (AOCL) presented on the Consolidated Balance Sheet and the impact of significant amounts reclassified from AOCL on information presented in the Consolidated Statement of Income for the nine months ended September 30, 2022 and 2021 are reflected in the table below.

Changes in Accumulated Other Comprehensive Income (Loss) by Component⁽¹⁾ (Millions of dollars)

 $^{^{\}left(1\right) }$ All amounts are net of tax.

⁽²⁾ Refer to Note 14 Financial and Derivative Instruments for reclassified components of cash flow hedging.

⁽³⁾ Refer to Note 8 Employee Benefits for reclassified components, including amortization of actuarial gains or losses, amortization of prior service costs and settlement losses, totaling \$519 million that are included in employee benefit costs for the nine months ended September 30, 2022. Related income taxes for the same period, totaling \$125 million, are reflected in "Income Tax Expense" on the Consolidated Statement of Income. All other reclassified amounts were insignificant.

Note 3. Information Relating to the Consolidated Statement of Cash Flows

	Nine Months Ended September 30			
	 2022		2021	
	 (Millions	of dolla	ırs)	
Distributions more (less) than income from equity affiliates includes the following:				
Distributions from equity affiliates	\$ 2,194	\$	1,838	
(Income) loss from equity affiliates	(6,962)		(4,000)	
Distributions more (less) than income from equity affiliates	\$ (4,768)	\$	(2,162)	
Net decrease (increase) in operating working capital was composed of the following:				
Decrease (increase) in accounts and notes receivable	\$ (4,428)	\$	(5,692)	
Decrease (increase) in inventories	(2,170)		(353)	
Decrease (increase) in prepaid expenses and other current assets	(479)		(94)	
Increase (decrease) in accounts payable and accrued liabilities	5,282		3,842	
Increase (decrease) in income and other taxes payable	2,967		838	
Net decrease (increase) in operating working capital	\$ 1,172	\$	(1,459)	
Net cash provided by operating activities includes the following cash payments:				
Interest on debt (net of capitalized interest)	\$ 320	\$	427	
Income taxes	 6,750		2,943	
Proceeds and deposits related to asset sales and returns of investment consisted of the following gross amounts:				
Proceeds and deposits related to asset sales	\$ 1,406	\$	563	
Returns of investment from equity affiliates	1,079		23	
Proceeds and deposits related to asset sales and returns of investment	\$ 2,485	\$	586	
Net sales (purchases) of marketable securities consisted of the following gross amounts:				
Marketable securities purchased	\$ (9)	\$	(3)	
Marketable securities sold	91		2	
Net sales (purchases) of marketable securities	\$ 82	\$	(1)	
Net repayment (borrowing) of loans by equity affiliates consisted of the following gross amounts:				
Borrowing of loans by equity affiliates	\$ (27)	\$	_	
Repayment of loans by equity affiliates	65		389	
Net repayment (borrowing) of loans by equity affiliates	\$ 38	\$	389	
Net borrowings (repayments) of short-term obligations consisted of the following gross and net amounts:				
Proceeds from issuances of short-term obligations	\$ _	\$	4,449	
Repayments of short-term obligations			(6,225)	
Net borrowings (repayments) of short-term obligations with three months or less maturity	278		(1,851)	
Net borrowings (repayments) of short-term obligations	\$ 278	\$	(3,627)	
Net sales (purchases) of treasury shares consists of the following gross and net amounts:				
Shares issued for share-based compensation plans	\$ 5,505	\$	388	
Shares purchased under share repurchase and deferred compensation plans	(7,505)		(633)	
Net sales (purchases) of treasury shares	\$ (2,000)	\$	(245)	
Net contributions from (distributions to) noncontrolling interests consisted of the following gross amounts:				
Distributions to noncontrolling interests	\$ (107)	\$	(51)	
Contributions from noncontrolling interests	 4		17	
Net contributions from (distributions to) noncontrolling interests	\$ (103)	\$	(34)	

The Consolidated Statement of Cash Flows excludes changes to the Consolidated Balance Sheet that did not affect cash.

The "Other" line in the Operating Activities section includes changes in postretirement benefits obligations and other long-term liabilities.

The company paid dividends of \$1.42 per share of common stock in third quarter 2022. This compares to dividends of \$1.34 per share paid in the year-ago corresponding period.

The components of "Capital expenditures" are presented in the following table:

	Nine Mor Septer	iths End nber 30	
	2022		2021
	(Millions	of dolla	rs)
Additions to properties, plant and equipment	\$ 6,901	\$	5,087
Additions to investments	932		309
Current-year dry hole expenditures	137		55
Payments for other assets and liabilities, net	169		(1)
Capital expenditures	\$ 8,139	\$	5,450

The table below quantifies the beginning and ending balances of restricted cash and restricted cash equivalents in the Consolidated Balance Sheet:

		At September 30				At Dece	mber (aber 31		
		2022 2021				2021		2020		
	(Millions of dollars)									
Cash and cash equivalents	\$	15,164	\$	5,998	\$	5,640	\$	5,596		
Restricted cash included in "Prepaid expenses and other current assets"		742		246		333		365		
Restricted cash included in "Deferred charges and other assets"		791		781		822		776		
Total cash, cash equivalents and restricted cash	\$	16,697	\$	7,025	\$	6,795	\$	6,737		

Additional information related to restricted cash is included in Note 13 Fair Value Measurements under the heading "Restricted Cash."

Note 4. Summarized Financial Data — Tengizchevroil LLP

Chevron has a 50 percent equity ownership interest in Tengizchevroil LLP (TCO). Summarized financial information for 100 percent of TCO is presented in the following table:

		Nine Months Ended September 30					
		2022 2021					
		rs)					
Sales and other operating revenues	\$	18,682	\$	10,845			
Costs and other deductions		9,003		5,568			
Net income attributable to TCO	\$	6,779	\$	3,692			

Note 5. Summarized Financial Data — Chevron Phillips Chemical Company LLC

Chevron has a 50 percent equity ownership interest in Chevron Phillips Chemical Company LLC (CPChem). Summarized financial information for 100 percent of CPChem is presented in the following table:

	Nine Months Ended September 30					
	 2022		2021			
	(Millions of dollars)					
Sales and other operating revenues	\$ 11,446	\$	10,414			
Costs and other deductions	10,195		7,972			
Net income attributable to CPChem	\$ 1,565	\$	2,797			

Note 6. Summarized Financial Data — Chevron U.S.A. Inc.

Chevron U.S.A. Inc. (CUSA) is a major subsidiary of Chevron Corporation. CUSA and its subsidiaries manage and operate most of Chevron's U.S. businesses. Assets include those related to the exploration and production of crude oil, natural gas and natural gas liquids and those associated with refining, marketing, and supply and distribution of products derived from petroleum, excluding most of the regulated pipeline operations of Chevron. CUSA also holds the company's investment in the CPChem joint venture, which is accounted for using the equity method.

The summarized financial information for CUSA and its consolidated subsidiaries is as follows:

	Nine Months Ended September 30					
		2021				
	(Millions of dollars)					
Sales and other operating revenues	\$	142,407	\$	85,002		
Costs and other deductions		129,704		81,553		
Net income (loss) attributable to CUSA	\$	10,601	\$	4,184		

	At September 30, 2022	At December 31, 2021
	(Millions	of dollars)
Current assets	\$ 33,888	\$ 20,216
Other assets	49,027	47,355
Current liabilities	22,211	17,824
Other liabilities	18,812	18,438
Total CUSA net equity	\$ 41,892	\$ 31,309
Memo: Total debt	\$ 10,705	\$ 11,693

Note 7. Operating Segments and Geographic Data

Although each subsidiary of Chevron is responsible for its own affairs, Chevron Corporation manages its investments in these subsidiaries and their affiliates. The investments are grouped into two business segments, Upstream and Downstream, representing the company's "reportable segments" and "operating segments." Upstream operations consist primarily of exploring for, developing, producing and transporting crude oil and natural gas; liquefaction, transportation and regasification associated with liquefied natural gas (LNG); transporting crude oil by major international oil export pipelines; processing, transporting, storage and marketing of natural gas; and a gas-to-liquids plant. Downstream operations consist primarily of refining of crude oil into petroleum products; marketing of crude oil, refined products, and lubricants; manufacturing and marketing of renewable fuels; transporting of crude oil and refined products by pipeline, marine vessel, motor equipment and rail car; and manufacturing and marketing of commodity petrochemicals, plastics for industrial uses, and fuel and lubricant additives. "All Other" activities of the company include worldwide cash management and debt financing activities, corporate administrative functions, insurance operations, real estate activities, and technology companies.

The company's segments are managed by "segment managers" who report to the "chief operating decision maker" (CODM). The segments represent components of the company that engage in activities (a) from which revenues are earned and expenses are incurred; (b) whose operating results are regularly reviewed by the CODM, which makes decisions about resources to be allocated to the segments and assesses their performance; and (c) for which discrete financial information is available.

The company's primary country of operation is the United States of America, its country of domicile. Other components of the company's operations are reported as "International" (outside the United States).

Segment Earnings The company evaluates the performance of its operating segments on an after-tax basis, without considering the effects of debt financing interest expense or investment interest income, both of which are managed by the company on a worldwide basis. Corporate administrative costs and assets are not allocated to the operating segments. However, operating segments are billed for the direct use of corporate services. Nonbillable costs remain at the corporate level in "All Other." Earnings by major operating area for the three- and nine-month periods ended September 30, 2022 and 2021, are presented in the following table:

	Three Months Ended September 30				Nine Months Ended September 30

Segment Sales and Other Operating Revenues Segment sales and other operating revenues, including internal transfers, for the three- and nine-month periods ended September 30, 2022 and 2021, are presented in the following table. Products are transferred between operating segments at internal product values that approximate market prices. Revenues for the upstream segment are derived primarily from the production and sale of crude oil and natural gas, as well as the sale of third-party production of natural gas. Revenues for the downstream segment are derived primarily from the refining and marketing of petroleum products such as gasoline, jet fuel, gas oils, lubricants, residual fuel oils, other products derived from crude oil, and manufacturing and marketing of renewable fuels. This segment also generates revenues from the manufacture and sale of fuel and lubricant additives and the transportation and trading of refined products and crude oil. "All Other" activities include revenues from insurance operations, real estate activities and technology companies.

Note 8. Employee Benefits

Chevron has defined benefit pension plans for many employees. The company typically prefunds defined benefit plans as required by local regulations or in certain situations where prefunding provides economic advantages. In the United States, all qualified plans are subject to the Employee Retirement Income Security Act minimum funding standard. The company does not typically fund U.S. nonqualified pension plans that are not subject to funding requirements under laws and regulations because contributions to these pension plans may be less economic and investment returns may be less attractive than the company's other investment alternatives.

The company also sponsors other postretirement employee benefit (OPEB) plans that provide medical and dental benefits, as well as life insurance for some active and qualifying retired employees. The plans are unfunded, and the company and the retirees share the costs. For the company's main U.S. medical plan, the increase to the pre-Medicare company contribution for retiree medical coverage is limited to no more than four percent each year. Certain life insurance benefits are paid by the company.

The components of net periodic benefit costs for 2022 and 2021 are as follows:

	Three Months Ended September 30			Nine Months Ended September 30			
	2022		2021	 2022		2021

Net Periodic Other Benefit Costs	\$ 22	\$	22	\$ 67	\$	64	

^{*} Includes costs for U.S. and international OPEB plans. Obligations for plans outside the United States are not significant relative to the company's total OPEB obligation.

Through September 30, 2022, a total of \$1.1 billion was contributed to employee pension plans (including \$953 million to the U.S. plans). Contribution amounts are dependent upon plan investment returns, changes in pension obligations, regulatory requirements and other economic factors. Additional funding may ultimately be required if investment returns are insufficient to offset increases in plan obligations.

During the first nine months of 2022, the company contributed \$121 million to its OPEB plans.

Note 9. Assets Held For Sale

At September 30, 2022, the company classified \$424 million of net properties, plant and equipment as "Assets held for sale" on the Consolidated Balance Sheet. These assets are associated with upstream operations that are anticipated to be sold in the next 12 months. The revenues and earnings contributions of these assets in 2021 and the first nine months of 2022 were not material.

Note 10. Income Taxes

The income tax expense increased between quarterly periods from \$1.9 billion in 2021 to \$3.6 billion in 2022. The company's income before income tax expense increased \$6.8 billion from \$8.1 billion in 2021 to \$14.8

billion in 2022, primarily due to higher realizations and downstream margins. The company's effective tax rate remained unchanged at 24 percent between quarterly periods in 2021 and 2022.

The income tax expense increased between the nine-month periods from \$4.0 billion in 2021 to \$10.6 billion in 2022. This increase is a direct result of the company's income before income tax expense increasing \$25.2 billion, from \$14.7 billion in 2021 to \$39.9 billion in 2022. The increase in income is primarily due to higher realizations and downstream margins. The company's effective tax rate changed between the nine-month periods from 28 percent in 2021 to 27 percent in 2022. The change in effective tax rate is primarily a consequence of the mix effects, resulting from the absolute level of earnings or losses and whether they arose in higher or lower tax rate jurisdictions, and higher favorable international tax items.

Tax positions for Chevron and its subsidiaries and affiliates are subject to income tax audits by many tax jurisdictions throughout the world. For the company's major tax jurisdictions, examinations of tax returns for certain prior tax years had not been completed as of September 30, 2022. For these jurisdictions, the latest years for which income tax examinations had been finalized were as follows: United States — 2016, Nigeria — 2007, Australia — 2009, Kazakhstan — 2012 and Saudi Arabia — 2016.

The company engages in ongoing discussions with tax authorities regarding the resolution of tax matters in the various jurisdictions. Both the outcomes for these tax matters and the timing of resolution and/or closure of the tax audits are highly uncertain. However, it is reasonably possible that developments regarding tax matters in certain tax jurisdictions may result in significant increases or decreases in the company's total unrecognized tax benefits within the next 12 months. Given the number of years that still remain subject to examination and the number of matters being examined in the various tax jurisdictions, the company is unable to estimate the range of possible adjustments to the balance of unrecognized tax benefits.

Note 11. Litigation

Ecuador

Texaco Petroleum Company (Texpet), a subsidiary of Texaco Inc., was a minority member of an oil production consortium with Ecuadorian state-owned Petroecuador from 1967 until 1992. After termination of the consortium and a third-party environmental audit, Ecuador and the consortium parties entered into a settlement agreement specifying Texpet's remediation obligations. Following Texpet's completion of a three-year remediation program, Ecuador certified the remediation as proper and released Texpet and its affiliates from environmental liability. In May 2003, plaintiffs alleging environmental harm from the consortium's activities sued Chevron in the Superior Court in Lago Agrio, Ecuador. In February 2011, that court entered a judgment against Chevron for approximately \$9.5 billion plus additional punitive damages. An appellate panel affirmed, and Ecuador's National Court of Justice ratified the judgment but nullified the punitive damages, resulting in a judgment of approximately \$9.5 billion. Ecuador's highest Constitutional Court rejected Chevron's final appeal in July 2018.

In February 2011, Chevron sued the Lago Agrio plaintiffs and several of their lawyers and supporters in the U.S. District Court for the Southern District of New York (SDNY) for violations of the Racketeer Influenced and Corrupt Organizations (RICO) Act and state law. The SDNY court ruled that the Ecuadorian judgment had been procured through fraud, bribery, and corruption, and prohibited the RICO defendants from seeking to enforce the Ecuadorian judgment in the United States or profiting from their illegal acts. The Court of Appeals for the Second Circuit affirmed, and the U.S. Supreme Court denied certiorari in June 2017, rendering final the U.S. judgment in favor of Chevron. The Lago Agrio plaintiffs sought to have the Ecuadorian judgment recognized and enforced in Canada, Brazil, and Argentina. All of those recognition and enforcement actions were dismissed and resolved in Chevron's favor. Chevron and Texpet filed an arbitration claim against Ecuador in September 2009 before an arbitral tribunal administered by the Permanent Court of Arbitration in The Hague, under the United States-Ecuador Bilateral Investment Treaty. In August 2018, the Tribunal issued an award holding that the Ecuadorian judgment was based on environmental claims that Ecuador had settled and released, and that it was procured through fraud, bribery, and corruption. According to the Tribunal, the Ecuadorian judgment "violates international public policy" and "should not be recognized or enforced by the courts of other States." The Tribunal ordered Ecuador to remove the status of enforceability from the Ecuadorian judgment and to compensate Chevron for any injuries resulting from the

judgment. The third and final phase of the arbitration, to determine the amount of compensation Ecuador owes to Chevron, is ongoing. In September 2020, the District Court of The Hague denied Ecuador's request to set aside the Tribunal's award, stating that it now is "common ground" between Ecuador and Chevron that the Ecuadorian judgment is fraudulent. In December 2020, Ecuador appealed the District Court's decision to The Hague Court of Appeals. In June 2022, The Hague Court of Appeals dismissed Ecuador's appeal. In September 2022, Ecuador appealed to the Dutch Supreme Court. In a separate proceeding, Ecuador admitted that the Ecuadorian judgment is fraudulent in a public filing with the Office of the United States Trade Representative in July 2020. Management continues to believe that the Ecuadorian judgment is illegitimate and unenforceable and will vigorously defend against any further attempts to have it recognized or enforced.

Climate Change

Governmental and other entities in various jurisdictions across the United States have filed legal proceedings against fossil fuel producing companies, including Chevron entities, purporting to seek legal and equitable relief to address alleged impacts of climate change. Chevron entities are or were among the codefendants in 22 separate lawsuits brought by 17 U.S. cities and counties, three U.S. states, the District of Columbia and a trade group. One of the city lawsuits was dismissed on the merits, and one of the county lawsuits was voluntarily dismissed by the plaintiff. The lawsuits assert various causes of action, including public nuisance, private nuisance, failure to warn, design defect, product defect, trespass, negligence, impairment of public trust, and violations of consumer protection statutes, based upon the company's production of oil and gas products and alleged misrepresentations or omissions relating to climate change risks associated with those products. The unprecedented legal theories set forth in these proceedings entail the possibility of damages liability (both compensatory and punitive), injunctive and other forms of equitable relief, including without limitation abatement and disgorgement of profits, civil penalties and liability for fees and costs of suits, that, while we believe remote, could have a material adverse effect on the company's results of operations and financial condition. Further such proceedings are likely to be filed by other parties. Management believes that these proceedings are legally and factually meritless and detract from constructive efforts to address the important policy issues presented by climate change, and will vigorously defend against such proceedings.

Louisiana

Seven coastal parishes and the State of Louisiana have filed lawsuits in Louisiana against numerous oil and gas companies seeking damages for coastal erosion in or near oil fields located within Louisiana's coastal zone under Louisiana's State and Local Coastal Resources Management Act (SLCRMA). Chevron entities are defendants in 39 of these cases. The lawsuits allege that the defendants' historical operations were conducted without necessary permits or failed to comply with permits obtained and seek damages and other relief, including the costs of restoring coastal wetlands allegedly impacted by oil field operations. Plaintiffs' SLCRMA theories are unprecedented; thus, there remains significant uncertainty about the scope of the claims and alleged damages and any potential effects on the company's results of operations and financial condition. Management believes that the claims lack legal and factual merit and will continue to vigorously defend against such proceedings.

Note 12. Other Contingencies and Commitments

Income Taxes The company calculates its income tax expense and liabilities quarterly. These liabilities generally are subject to audit and are not finalized with the individual taxing authorities until several years after the end of the annual period for which income taxes have been calculated. Refer to Note 10 Income Taxes for a discussion of the periods for which tax returns have been audited for the company's major tax jurisdictions.

Settlement of open tax years, as well as other tax issues in countries where the company conducts its businesses, are not expected to have a material effect on the consolidated financial position or liquidity of the company and, in the opinion of management, adequate provision has been made for income taxes for all years under examination or subject to future examination.

Guarantees The company and its subsidiaries have certain contingent liabilities with respect to guarantees, direct or indirect, of debt of affiliated companies or third parties. Under the terms of the guarantee

arrangements, the company would generally be required to perform should the affiliated company or third party fail to fulfill its obligations under the arrangements. In some cases, the guarantee arrangements may have recourse provisions that would enable the company to recover any payments made under the terms of the guarantees from assets provided as collateral.

Indemnifications The company often includes standard indemnification provisions in its arrangements with its partners, suppliers and vendors in the ordinary course of business, the terms of which range in duration and sometimes are not limited. The company may be obligated to indemnify such parties for losses or claims suffered or incurred in connection with its service or other claims made against such parties.

Long-Term Unconditional Purchase Obligations and Commitments, Including Throughput and Take-or-Pay Agreements The company and its subsidiaries have certain contingent liabilities with respect to long-term unconditional purchase obligations and commitments, including throughput and take-or-pay agreements, some of which may relate to suppliers' financing arrangements. The agreements typically provide goods and services, such as pipeline and storage capacity, utilities, and petroleum products, to be used or sold in the ordinary course of the company's business.

Environmental The company is subject to loss contingencies pursuant to laws, regulations, private claims and legal proceedings related to environmental matters that are subject to legal settlements or that in the future may require the company to take action to correct or ameliorate the effects on the environment of prior release of chemicals or petroleum substances by the company or other parties. Such contingencies may exist for various operating, closed and divested sites, including, but not limited to, U.S. federal Superfund sites and analogous sites under state laws, refineries, chemical plants, marketing facilities, crude oil fields, and mining sites.

Although the company has provided for known environmental obligations that are probable and reasonably estimable, it is likely that the company will continue to incur additional liabilities. The amount of additional future costs are not fully determinable due to such factors as the unknown magnitude of possible contamination, the unknown timing and extent of the corrective actions that may be required, the determination of the company's liability in proportion to other responsible parties, and the extent to which such costs are recoverable from third parties. These future costs may be material to results of operations in the period in which they are recognized, but the company does not expect these costs will have a material effect on its consolidated financial position or liquidity.

Other Contingencies Chevron receives claims from and submits claims to customers; trading partners; joint venture partners; U.S. federal, state and local regulatory bodies; governments; contractors; insurers; suppliers; and individuals. The amounts of these claims, individually and in the aggregate, may be significant and take lengthy periods to resolve, and may result in gains or losses in future periods.

The company and its affiliates also continue to review and analyze their operations and may close, retire, sell, exchange, acquire or restructure assets to achieve operational or strategic benefits and to improve competitiveness and profitability. These activities, individually or together, may result in significant gains or losses in future periods.

Note 13. Fair Value Measurements

The three levels of the fair value hierarchy of inputs the company uses to measure the fair value of an asset or liability are described as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets and liabilities. For the company, Level 1 inputs include exchange-traded futures contracts for which the parties are willing to transact at the exchange-quoted price and marketable securities that are actively traded.

Level 2: Inputs other than Level 1 that are observable, either directly or indirectly. For the company, Level 2 inputs include quoted prices for similar assets or liabilities, prices obtained through third-party broker quotes and prices that can be corroborated with other observable inputs for substantially the complete term of a contract.

Level 3: Unobservable inputs. The company does not use Level 3 inputs for any of its recurring fair value measurements. Level 3 inputs may be required for the determination of fair value associated with certain nonrecurring measurements of nonfinancial assets and liabilities.

The fair value hierarchy for assets and liabilities measured at fair value at September 30, 2022, and December 31, 2021, is as follows:

Assets and Liabilities Measured at Fair Value on a Recurring Basis (Millions of dollars)

	At September 30, 2022						At December 31, 2021								
	Total	Level 1		1 Level 2		Level 3		Total		Level 1		Level 2		Level 3	
Marketable Securities	\$ 267	\$	267	\$	_	\$	_	\$	35	\$	35	\$	_	\$	_
Derivatives - not designated	243		100		143		_		313		285		28		_
Derivatives - designated	49		49		_		_		_		_		_		_
Total Assets at Fair Value	\$ 559	\$	416	\$	143	\$	_	\$	348	\$	320	\$	28	\$	
Derivatives - not designated	163		62		101		_		72		24		48		_
Total Liabilities at Fair Value	\$ 163	\$	62	\$	101	\$	_	\$	72	\$	24	\$	48	\$	

Marketable Securities The company calculates fair value for its marketable securities based on quoted market prices for identical assets. The fair values reflect the cash that would have been received if the instruments were sold at September 30, 2022.

Derivatives The company records most of its derivative instruments — other than any commodity derivative contracts that are accounted for as normal purchase and normal sale — on the Consolidated Balance Sheet at fair value, with the offsetting amount to the Consolidated Statement of Income. The company designates certain derivative instruments as cash flow hedges that, if applicable, are reflected in the table above. Derivatives classified as Level 1 include futures, swaps and options contracts valued using quoted prices from active markets such as the New York Mercantile Exchange. Derivatives classified as Level 2 include swaps, options and forward contracts, the fair values of which are obtained from third-party broker quotes, industry pricing services and exchanges. The company obtains multiple sources of pricing information for the Level 2 instruments. Since this pricing information is generated from observable market data, it has historically been very consistent. The company does not materially adjust this information.

Assets and liabilities carried at fair value at September 30, 2022, and December 31, 2021, are as follows:

Cash and Cash Equivalents The company holds cash equivalents in U.S. and non-U.S. portfolios. The instruments classified as cash equivalents are primarily bank time deposits with maturities of 90 days or less, and money market funds. "Cash and cash equivalents" had carrying/fair values of \$15.2 billion and \$5.6 billion at September 30, 2022, and December 31, 2021, respectively. The fair values of cash and cash equivalents are classified as Level 1 and reflect the cash that would have been received if the instruments were settled at September 30, 2022.

Restricted Cash had a carrying/fair value of \$1.5 billion and \$1.2 billion at September 30, 2022 and December 31, 2021, respectively. At September 30, 2022, restricted cash is classified as Level 1 and includes restricted funds related to certain upstream decommissioning activities, tax payments and a financing program, which are reported in "Prepaid expenses and other current assets" and "Deferred charges and other assets" on the Consolidated Balance Short

Long-Term Debt had a net carrying value, excluding amounts reclassified from short-term debt, purchase price fair value adjustments and finance lease obligations, of \$16.4 billion and \$22.2 billion at September 30, 2022, and December 31, 2021, respectively. The fair value of long-term debt for the company was \$14.9 billion and \$23.7 billion at September 30, 2022 and December 31, 2021, respectively. Long-term debt primarily includes corporate issued bonds, classified as Level 1 and are \$14.5 billion for the period. The fair value of other long-term debt classified as Level 2 is \$0.4 billion.

The carrying values of other short-term financial assets and liabilities on the Consolidated Balance Sheet approximate their fair values. Fair value remeasurements of other financial instruments at September 30, 2022, and December 31, 2021, were not material.

The fair value hierarchy for assets and liabilities measured at fair value on a nonrecurring basis at September 30, 2022, is as follows:

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis (Millions of dollars)

At September 30, 2022 Before-Tax Loss Three Months Nine Months Total Level 3 Ended Ended Properties, plant and equipment, net (held and used) \$ 210 54 54 210 \$ Properties, plant and equipment, net (held for sale) 3 3 Investments and advances **Total Assets at Fair Value** 213 \$ \$ \$ \$

Properties, plant and equipment The company did not have any individually material impairments of long-lived assets measured at fair value on a nonrecurring basis to report.

Investments and advances The company did not have any impairments of investments and advances measured at fair value on a nonrecurring basis to report in third quarter 2022.

Note 14. Financial and Derivative Instruments

The company's commodity derivative instruments principally include crude oil, natural gas, liquefied natural gas and refined product futures, swaps, options and forward contracts. The company applies cash flow hedge accounting to certain commodity transactions, where appropriate, to manage the market price risk associated with forecasted sales of crude oil. The company's derivatives are not material to the company's consolidated financial position, results of operations or liquidity. The company believes it has no material market or credit risks to its operations, financial position or liquidity as a result of its commodities and other derivatives activities.

The company uses commodity derivative instruments traded on the New York Mercantile Exchange and on electronic platforms of the Inter-Continental Exchange and Chicago Mercantile Exchange. In addition, the company enters into swap contracts and option contracts principally with major financial institutions and other oil and gas companies in the "over-the-counter" markets, which are governed by International Swaps and Derivatives Association agreements and other master netting arrangements.

Derivative instruments measured at fair value at September 30, 2022, and December 31, 2021, and their classification on the Consolidated Balance Sheet and Consolidated Statement of Income are as follows:

Consolidated Balance Sheet: Fair Value of Derivatives (Millions of dollars)

Type of Contract	Balance Sheet Classification	A	t September 30, 2022	At December 31, 2021
Commodity	Accounts and notes receivable, net	\$	282	\$ 251
Commodity	Long-term receivables, net		10	62
Total Assets a	t Fair Value	\$	292	\$ 313
Commodity	Accounts payable	\$	143	\$ 71
Commodity	Deferred credits and other noncurrent obligations		20	1
Total Liabiliti	ies at Fair Value	\$	163	\$ 72

Consolidated Statement of Income: The Effect of Derivatives (Millions of dollars)

Type of		Gain / Three Mo Septer	Gain / (Loss) Nine Months Ended September 30					
Contract	Statement of Income Classification	 2022	2021	2022		2021		
Commodity	Sales and other operating revenues	\$ 55	\$ 203	\$ (892)	\$	(339)		
Commodity	Purchased crude oil and products	24	(21)	(210)		(45)		
Commodity	Other income	(10)	(8)	(16)		(43)		
		\$ 69	\$ 174	\$ (1,118)	\$	(427)		

In the nine months ended September 30, 2022, cash flow hedging contracts increased Sales and other operating revenues by \$31 million compared with a decrease of \$2 million in the same period of the prior year. At September 30, 2022, before-tax deferred gains in Accumulated Other Comprehensive Losses related to outstanding crude oil price hedging contracts were \$49 million, of which all is expected to be reclassified into earnings during the next 12 months as the hedged crude oil sales are recognized in earnings.

The following table represents gross and net derivative assets and liabilities subject to netting agreements on the Consolidated Balance Sheet at September 30, 2022, and December 31, 2021.

Consolidated Balance Sheet: The Effect of Netting Derivative Assets and Liabilities (Millions of dollars)

At September 30, 2022	ross Amounts Recognized	Gross Amounts Offset	Net Amounts Presented	G	Cross Amounts Not Offset	Net Amount
Derivative Assets - not designated	\$ 4,042	\$ 3,799	\$ 243	\$	6	\$ 237
Derivative Assets - designated	\$ 50	\$ 1	\$ 49	\$	_	\$ 49
Derivative Liabilities - not designated	\$ 3,962	\$ 3,799	\$ 163	\$	42	\$ 121
Derivative Liabilities - designated	\$ 1	\$ 1	\$ _	\$	_	\$ _
At December 31, 2021						
Derivative Assets - not designated	\$ 1,684	\$ 1,371	\$ 313	\$	_	\$ 313
Derivative Liabilities - not designated	\$ 1,443	\$ 1,371	\$ 72	\$	_	\$ 72

Derivative assets and liabilities are classified on the Consolidated Balance Sheet as accounts and notes receivable, long-term receivables, accounts payable, and deferred credits and other noncurrent obligations. Amounts not offset on the Consolidated Balance Sheet represent positions that do not meet all the conditions for "a right of offset."

Note 15. Revenue

"Sales and other operating revenue" on the Consolidated Statement of Income primarily arise from contracts with customers. Related receivables are included in "Accounts and notes receivable, net" on the Consolidated Balance Sheet, net of the current expected credit losses. The net balance of these receivables was \$15.0 billion and \$12.9 billion at September 30, 2022, and December 31, 2021, respectively. Other items included in "Accounts and notes receivable, net" represent amounts due from partners for their share of joint venture operating and project costs and amounts due from others, primarily related to derivatives, leases, buy/sell arrangements and product exchanges, which are accounted for outside the scope of ASC 606.

Note 16. Financial Instruments - Credit Losses

Chevron's expected credit loss allowance balance was \$884 million as of September 30, 2022 and \$745 million as of December 31, 2021, with a majority of the allowance relating to non-trade receivable balances.

The majority of the company's receivable balance is concentrated in trade receivables, with a balance of \$19.9 billion as of September 30, 2022, which reflects the company's diversified sources of revenues and is

dispersed across the company's broad worldwide customer base. As a result, the company believes the concentration of credit risk is limited. The company routinely assesses the financial strength of its customers. When the financial strength of a customer is not considered sufficient, alternative risk mitigation measures may be deployed, including requiring prepayments, letters of credit or other acceptable forms of collateral. Once credit is extended and a receivable balance exists, the company applies a quantitative calculation to current trade receivable balances that reflects credit risk predictive analysis, including probability of default and loss given default, which takes into consideration current and forward-looking market data as well as the company's historical loss data. This statistical approach becomes the basis of the company's expected credit loss allowance for current trade receivables with payment terms that are typically short-term in nature, with most due in less than 90 days.

Chevron's non-trade receivable balance was \$4.6 billion as of September 30, 2022, which includes receivables from certain governments in their capacity as joint venture partners. Joint venture partner balances that are paid as per contract terms or not yet due are subject to the statistical analysis described above while past due balances are subject to additional qualitative management quarterly review. This management review includes review of reasonable and supportable repayment forecasts. Non-trade receivables also include employee and tax receivables that are deemed immaterial and low risk. Equity affiliate loans are also considered non-trade and associated allowances of \$560 million are included within Investments and Advances on the Consolidated Balance Sheet at both September 30, 2022, and December 31, 2021.

Note 17. Acquisition of Renewable Energy Group, Inc.

On June 13, 2022, the company acquired Renewable Energy Group, Inc. (REG), an independent company focused on converting natural fats, oils and greases into advanced biofuels. REG utilizes a global integrated production, procurement, distribution and logistics network to operate 11 biorefineries in the U.S. and Europe. Ten biorefineries produce biodiesel and one produces renewable diesel. The acquisition combines REG's growing renewable fuels production and leading feedstock capabilities with Chevron's large manufacturing, distribution and commercial marketing position.

Chevron acquired outstanding shares of REG in an all-cash transaction valued at \$3.15 billion, or \$61.50 per share. As part of the transaction, the company recognized long-term debt and finance leases with a fair value of \$590 million.

The acquisition was accounted for as a business combination under ASC 805, which requires assets acquired and liabilities assumed to be measured at their acquisition date fair values. Provisional fair value measurements were made for acquired assets and liabilities, and adjustments to those measurements may be made in subsequent periods, up to one year from the acquisition date, as information necessary to complete the analysis is obtained. Tangible and intangible assets were valued using a combination of replacement cost approach and discounted cash flows that incorporated internally generated price assumptions and production profiles together with appropriate operating and capital cost assumptions. Debt assumed in the acquisition was valued based on observable market prices for REG's debt. As a result of measuring the assets acquired and the liabilities assumed at fair value, the company recognized \$293 million of goodwill.

The following table summarizes the values assigned to assets acquired and liabilities assumed:

	At June 13, 2022
	(Millions of dollars)
Current assets	\$ 1,584
Properties, plant and equipment	1,778
Deferred tax	92
Other assets	374
Total assets acquired	3,828
Current liabilities	301
Long-term debt and finance leases	590
Other liabilities	75
Total liabilities assumed	966
Net assets acquired	\$ 2,862
Goodwill	293
Purchase Price	\$ 3,155

Pro forma financial information is not disclosed as the acquisition was deemed not to have a material impact on the company's results of operations.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Third Quarter 2022 Compared with Third Quarter 2021

Key Financial Results

Earnings by Business Segment

θ ν										
	Three Mo Septe			Nine Mor Septer						
	 2022		2021	2022		2021

⁽²⁾ Income (loss) net of tax; also referred to as "earnings" in the discussions that follow.

Net income attributable to Chevron Corporation for third quarter 2022 was \$11.2 billion (\$5.78 per share — diluted), compared with \$6.1 billion (\$3.19 per share — diluted) in the third quarter of 2021. The net income attributable to Chevron Corporation for the first nine months of 2022 was \$29.1 billion (\$14.95 per share — diluted), compared with \$10.6 billion (\$5.51 per share — diluted) in the first nine months of 2021.

Upstream earnings in third quarter 2022 were \$9.3 billion compared with \$5.1 billion in the corresponding 2021 period. The increase was mainly due to higher realizations. Earnings for the first nine months of 2022 were \$24.8 billion compared with \$10.7 billion in the corresponding 2021 period. The increase was mainly due to higher realizations and favorable foreign currency effects, partially offset by higher operating expenses largely due to an early contract termination at Sabine Pass.

Downstream earnings in third quarter 2022 were \$2.5 billion compared with \$1.3 billion in the corresponding 2021 period. The increase was mainly due to higher margins on refined product sales, partially offset by higher operating expenses largely associated with planned turnarounds and lower earnings from the 50 percent-owned Chevron Phillips Chemical Company. Earnings for the first nine months of 2022 were \$6.4 billion compared with \$2.2 billion in the corresponding 2021 period. The increase was mainly due to higher margins on refined product sales and favorable foreign currency effects, partially offset by higher operating expenses.

Refer to "Results of Operations" for additional discussion of results by business segment and "All Other" activities for the third quarter and first nine months of 2022 versus the same periods in 2021.

Business Environment and Outlook

Chevron Corporation* is a global energy company with substantial business activities in the following countries: Angola, Argentina, Australia, Bangladesh, Brazil, Canada, China, Egypt, Equatorial Guinea, Israel, Kazakhstan, Kurdistan Region of Iraq, Mexico, Nigeria, the Partitioned Zone between Saudi Arabia and Kuwait, the Philippines, Republic of Congo, Singapore, South Korea, Thailand, the United Kingdom, the United States, and Venezuela.

^{*} Incorporated in Delaware in 1926 as Standard Oil Company of California, the company adopted the name Chevron Corporation in 1984 and ChevronTexaco Corporation in 2001. In 2005, ChevronTexaco Corporation changed its name to Chevron Corporation. As used in this report, the term "Chevron" and such terms as "the company," "the corporation," "our," "we," "us" and "its" may refer to Chevron Corporation, one or more of its consolidated subsidiaries, or all of them taken as a whole, but unless stated otherwise they do not include "affiliates" of Chevron — i.e., those companies generally owned 50 percent or less. All of these terms are used for convenience only and are not intended as a precise description of any of the separate companies, each of which manages its own affairs.

Table of Contents

The company's objective is to safely deliver higher returns, lower carbon and superior shareholder value in any business environment. Earnings of the company depend mostly on the profitability of its upstream business segment. The most significant factor affecting the results of operations for the upstream segment is the price of crude oil, which is determined in global markets outside of the company's control. In the company's downstream business, crude oil is the largest cost component of refined products. Periods of sustained lower commodity prices could result in the impairment or write-off of specific assets in future periods and cause the company to adjust operating expenses, including employee reductions, and capital and exploratory expenditures, along with other measures intended to improve financial performance.

Governments, companies, communities, and other stakeholders are increasingly supporting efforts to address climate change, recognizing that individuals and society benefit from access to affordable, reliable, and ever-cleaner energy. International initiatives and national, regional and state legislation and regulations, such as recent legislative and regulatory activity in California including the Advanced Clean Cars II regulations, that aim to directly or indirectly reduce GHG emissions are in various stages of adoption and implementation. These policies, some of which support the global net zero emissions ambitions of the Paris Agreement, can change the amount of energy consumed, the rate of energy-demand growth, the energy mix, and the relative economics of one fuel versus another. Implementation of these policies can be dependent on, and can affect the pace of, technological advancements, the granting of necessary permits by governing authorities, the availability of cost-effective, verifiable carbon credits, the availability of suppliers that can meet sustainability and other standards, evolving regulatory requirements affecting ESG standards or other disclosures, and evolving standards for tracking and reporting on emissions and emission reductions and removals. Beyond the legislative and regulatory landscape, ever changing customer and consumer behavior can also influence energy demand by affecting preferences and use of the company's products or competitors' products, now and in the future.

Chevron supports the Paris Agreement's global approach to governments addressing climate change and is committed to taking actions to help lower the carbon intensity of its operations while continuing to meet the need for energy that supports society. Chevron integrates climate change-related issues and the regulatory and other responses to these issues into its strategy and planning, capital investment reviews, and risk management tools and processes, where it believes they are applicable. They are also factored into the company's long-range supply, demand, and energy price forecasts. These forecasts reflect estimates of long-range effects from climate change-related policy actions, such as renewable fuel penetration and energy efficiency standards, and demand response to oil and natural gas prices. The actual level of expenditure required to comply with new or potential climate change-related laws and regulations and amount of additional investments in new or existing technology or facilities, such as carbon capture and storage, is difficult to predict with certainty and is expected to vary depending on the actual laws and regulations enacted or customer and consumer preference in a jurisdiction, the company's activities in it, and market conditions.

Although the future is uncertain, many published outlooks conclude that fossil fuels will remain a significant part of an energy system that increasingly incorporates lower carbon sources of supply. The company will continue to develop oil and gas resources to meet customers' demand for energy. At the same time, Chevron believes that the future of energy is lower carbon. The company will continue to maintain flexibility in its portfolio to be responsive to changes in policy, technology, and customer preferences. Chevron aims to grow its traditional oil and gas business, lower the carbon intensity of its operations and grow lower carbon businesses in renewable fuels, hydrogen, carbon capture and offsets. To grow its lower carbon businesses, Chevron plans to target sectors of the economy where emissions are harder to abate or that cannot be easily electrified, while leveraging the company's capabilities, assets and customer relationships. The company's traditional oil and gas business may increase or decrease depending upon regulatory or market forces, among other factors.

Chevron's previously disclosed 2050 net zero upstream aspiration, carbon intensity targets and planned lower-carbon capital spend through 2028 can be found on pages 32 through 34 of the company's 2021 Annual Report on Form 10-K.

Refer to "Cautionary Statements Relevant to Forward-Looking Information" on page 2 and to "Risk Factors" on pages 20 through 25 of the company's 2021 Annual Report on Form 10-K for a discussion of some of the inherent risks that could materially impact the company's results of operations or financial condition.

The effective tax rate for the company can change substantially during periods of significant earnings volatility. This is due to the mix effects that are impacted by both the absolute level of earnings or losses and whether they arise in higher or lower tax rate jurisdictions. As a result, a decline or increase in the effective income tax rate in one period may not be indicative of expected results in future periods. Additional information related to the company's effective income tax rate is included in Note 10 Income Taxes to the Consolidated Financial Statements.

The Inflation Reduction Act ("IRA"), enacted in the United States on August 16, 2022, imposes several new taxes that will be effective in 2023, including a 15 percent minimum tax on book income and a 1 percent excise tax on stock repurchases. The IRA also implements various incentives for lower carbon activities, including carbon capture and storage and the production of hydrogen and sustainable aviation fuel, and extends the federal biodiesel mixture excise tax credit through December 31, 2024. We are continuing to evaluate the impact that the IRA and any associated published and forthcoming Internal Revenue Service implementation guidance may have on our future results of operations.

The company continually evaluates opportunities to dispose of assets that are not expected to provide sufficient long-term value and to acquire assets or operations complementary to its asset base to help augment the company's financial performance and value growth. Asset dispositions and restructurings may result in significant gains or losses in future periods.

The company closely monitors developments in the financial and credit markets, the level of worldwide economic activity, and the implications for the company of movements in prices for crude oil and natural gas. Management takes these developments into account in the conduct of daily operations and for business planning.

The outbreak of COVID-19 caused a significant decrease in demand for our products and created disruptions and volatility in the global marketplace beginning late in first quarter 2020. Demand has largely recovered; however, there continues to be uncertainty around the extent to which the COVID-19 pandemic may impact our future results, which could be material.

Comments related to earnings trends for the company's major business areas are as follows:

Upstream Earnings for the upstream segment are closely aligned with industry prices for crude oil and natural gas. Crude oil and natural gas prices are subject to external factors over which the company has no control, including product demand connected with global economic conditions, industry production and inventory levels, technology advancements, production quotas or other actions imposed by OPEC+ countries, actions of regulators or governments, weather-related damage and disruptions, competing fuel prices, natural and human causes beyond the company's control such as the COVID-19 pandemic, and regional supply interruptions or fears thereof that may be caused by civil unrest, political uncertainty or military conflicts such as the ongoing conflict in Ukraine. Any of these factors could also inhibit the company's production and/or export capacity in an affected region. The company closely monitors developments in the countries in which it operates and holds investments and seeks to manage risks in operating its facilities and businesses.

The longer-term trend in earnings for the upstream segment is also a function of other factors, including the company's ability to find or acquire and efficiently produce crude oil and natural gas, changes in fiscal terms of contracts, and changes in tax, environmental and other applicable laws and regulations.

Caspian Pipeline Consortium (CPC), an equity affiliate, operates a 935-mile crude oil export pipeline from the Tengiz Field in Kazakhstan to tanker-loading facilities at Novorossiysk on the Russian coast of the Black Sea, providing the main export route for crude oil production from TCO, Karachaganak and other producing fields in Kazakhstan. Two of the three offshore loading moorings at the CPC marine terminal were taken out of service during August for equipment repairs identified during normal maintenance. Repairs are currently underway and are expected to be completed in fourth quarter 2022, assuming favorable weather conditions. CPC is capable of operating at approximately 70 percent of capacity with one single point mooring facility in

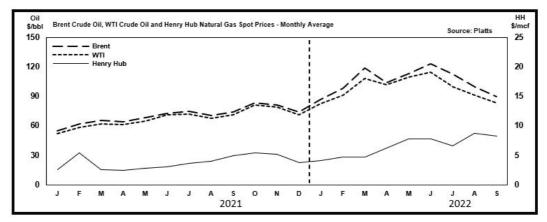

service. Production at TCO has not been curtailed since April 23, 2022, given third quarter turnaround activity at TCO and at other regional producers that ship through CPC. However, there is a risk that production from TCO could be curtailed in the future.

Governments (including Russia) have imposed and may impose additional sanctions and other trade laws, restrictions and regulations that could lead to disruption in our ability to produce, transport and/or export crude in the region around Russia and could have an adverse effect on CPC operations and/or the company's financial position. The financial impacts of such risks, including presently imposed sanctions, are not currently material for the company; however, it remains uncertain how long these conditions may last or how severe they may become.

The company's third party costs can be subject to external factors beyond its control including, but not limited to: the general level of inflation, tariffs or other taxes imposed on goods or services, and market-based prices charged by the industry's material and service providers.

Inflationary pressures continue for both oil and gas inputs (such as rigs, pipe and well services, etc.) as well as other industrial equipment and materials. Supply chain disruptions continue to limit the availability and deliverability of some inputs throughout the industry. In the near term, slowing economic activity could moderate inflationary pressures by reducing supplier backlogs and mitigating supply chain disruptions. The United States rig count was relatively flat in the third quarter of 2022 compared to the last quarter, while the international rig count was up, driven by onshore gas-directed drilling in Europe.

The company is actively managing its timing of scheduled work, contracting, procurement, and supply chain activities to assure reliable supply of goods and services, while effectively managing costs in support of its operations. Chevron utilizes contracts with various pricing mechanisms, so there may be a lag before the company's costs reflect the changes in market trends.

The chart above shows the trend in benchmark prices for Brent crude oil, West Texas Intermediate (WTI) crude oil, and U.S. Henry Hub natural gas. The Brent price averaged \$71 per barrel for the full-year 2021. During the third quarter of 2022, Brent averaged \$101 per barrel and ended October at about \$93. The WTI price averaged \$68 per barrel for the full-year 2021. During the third quarter of 2022, WTI averaged \$92 per barrel and ended October at about \$87. The majority of the company's equity crude production is priced based on the Brent and WTI benchmarks. Crude prices declined in the third quarter of 2022 driven by slowing demand due to COVID-19 lockdowns in China, a global macroeconomic slowdown, the release of U.S. Strategic Petroleum Reserves that boosted supply and a less-than-expected drop in Russian crude exports. However, in early October 2022, crude prices increased due to the announced OPEC+ production cuts. (Refer to "Selected Operating Data" for the company's average U.S. and international crude oil sales prices).

In contrast to price movements in the global market for crude oil, price changes for natural gas are also impacted by seasonal supply/demand and infrastructure conditions in local markets. In the U.S., prices at

Henry Hub averaged \$6.61 per thousand cubic feet (MCF) for the first nine months of 2022, compared with \$3.52 during the first nine months of 2021. At the end of October 2022, the Henry Hub spot price was \$4.95 per MCF.

Outside the U.S., price changes for natural gas also depend on a wide range of supply, demand and regulatory circumstances. The company's long-term contract prices for liquefied natural gas (LNG) are typically linked to crude oil prices. Most of the equity LNG offtake from the operated Australian LNG assets is committed under binding long-term contracts, with some sold in the spot LNG market. International natural gas realizations increased to \$9.56 per MCF during the first nine months of 2022, compared with \$5.30 per MCF in the same period last year mainly due to higher LNG prices in Europe and Asia. (Refer to "Selected Operating Data" for the company's average natural gas sales prices for the U.S. and international regions.)

The company's worldwide net oil-equivalent production in the first nine months of 2022 averaged 3.00 million barrels per day, a decrease of 3 percent from the first nine months of 2021 mainly as a result of contract expirations in Thailand and Indonesia. About 27 percent of the company's net oil-equivalent production in the first nine months of 2022 occurred in the OPEC+ member countries of Angola, Equatorial Guinea, Kazakhstan, Nigeria, the Partitioned Zone between Saudi Arabia and Kuwait and Republic of Congo.

Refer to "Results of Operations" for additional discussion of the company's upstream business.

Downstream Earnings for the downstream segment are closely tied to margins on the refining, manufacturing and marketing of products that include gasoline, diesel, jet fuel, lubricants, fuel oil, fuel and lubricant additives, petrochemicals and renewable fuels. Industry margins are sometimes volatile and can be affected by the global and regional supply-and-demand balance for refined products and petrochemicals, and by changes in the price of crude oil, other refinery and petrochemical feedstocks, and natural gas. Industry margins can also be influenced by inventory levels, geopolitical events, costs of materials and services, refinery or chemical plant capacity utilization, maintenance programs, and disruptions at refineries or chemical plants resulting from unplanned outages due to severe weather, fires or other operational events.

Other factors affecting profitability for downstream operations include the reliability and efficiency of the company's refining, marketing and petrochemical assets, the effectiveness of its crude oil and product supply functions, and the volatility of tanker-charter rates for the company's shipping operations, which are driven by the industry's demand for crude oil and product tankers. Other factors beyond the company's control include the general level of inflation and energy costs to operate the company's refining, marketing and petrochemical assets, and changes in tax, environmental, and other applicable laws and regulations.

Refining margins have been strong in 2022 because of recovering demand for refined products, low product inventories, lower industry refinery capacity and lower product exports from Russia and China. Refining utilization has been strong in 2022 to keep pace with demand growth. Although refining margins have been elevated, there are signs that higher refined product prices and concerns over macroeconomic conditions are slowing demand and may reduce margins.

The company's most significant marketing areas are the West Coast and Gulf Coast of the United States and Asia Pacific. Chevron operates or has significant ownership interests in refineries in each of these areas. Additionally, the company has a growing presence in renewable fuels, as evidenced by the acquisition of Renewable Energy Group, Inc.

Refer to "Results of Operations" for additional discussion of the company's downstream operations.

All Other consists of worldwide cash management and debt financing activities, corporate administrative functions, insurance operations, real estate activities and technology companies.

Noteworthy Developments

Certain noteworthy developments in recent months included the following:

• Australia – Received permits, as part of joint ventures, to assess carbon storage for three blocks totaling nearly 7.8 million acres in offshore Australia.

- · Canada Invested in Aurora Hydrogen, a company developing emission-free hydrogen production technology.
- Germany Broke ground on a lower carbon feedstock expansion project at the company's Emden bio-refinery.
- Japan Announced a joint collaboration agreement with Mitsui Oil Exploration Co., Ltd. to explore the technical and commercial feasibility of advanced geothermal power generation.
- Namibia Entered Namibia by acquiring an 80 percent working interest in a Deepwater oil and gas exploration lease.
- Republic of Congo Received final approval for extension of the Haute Mer production sharing contract to 2040.
- Singapore Signed a memorandum of understanding to form a consortium that aims to evaluate and advance development of large-scale carbon capture and storage solutions and integrated infrastructure.
- Singapore Delivered first shipment of offset-paired liquefied natural gas cargo.
- United States Invested in lower carbon technologies, including TAE Technologies, Inc. (fusion power) and Zero Emissions Industries (hydrogen fuel cell for maritime industry).
- United States Approved a project to increase light crude oil processing capacity by 15 percent at the company's Pasadena, Texas refinery.
- United States Delivered renewable natural gas for the first time from the Brightmark RNG Holdings LLC joint venture project in South Dakota.
- United States Broke ground on a joint venture solar energy project to generate renewable energy for the company's oil and gas operations in the Permian Basin in Texas and New Mexico.
- United States Awarded 34 exploration leases in the Gulf of Mexico.
- United States Announced investment in a new joint venture with California Bioenergy LLC to build infrastructure for the company's dairy biomethane projects in California.

Results of Operations

Business Segments The following section presents the results of operations and variances on an after-tax basis for the company's business segments — Upstream and Downstream — as well as for "All Other." (Refer to Note 7 Operating Segments and Geographic Data for a discussion of the company's "reportable segments," as defined under the accounting standards for segment reporting.)

Upstream

	Three Months Ended September 30				Nine Months Ended September 30				
	2022 2021				2022	2021			
	(Millions o				ars)				
U.S. Upstream Earnings	\$ 3,398	\$	1,962	\$	10,004	\$	4,349		

U.S. upstream reported earnings of \$3.4 billion in third quarter 2022, compared with \$2.0 billion from a year earlier. The increase was primarily due to higher realizations of \$1.6 billion and higher volumes of \$200 million, partially offset by the absence of third quarter 2021 asset sale gains of \$200 million.

U.S. upstream reported earnings of \$10.0 billion in the first nine months of 2022, compared with \$4.3 billion from a year earlier. The increase was primarily due to higher realizations of \$6.4 billion and higher sales volumes of \$500 million, partially offset by higher operating expenses of \$1.0 billion largely due to an early contract termination at Sabine Pass.

The average realization per barrel for U.S. crude oil and natural gas liquids in third quarter 2022 was \$76, compared with \$58 a year earlier. The average realization per barrel for U.S. crude oil and natural gas liquids in the first nine months of 2022 was \$80, compared with \$53 a year earlier. The average natural gas realization in third quarter 2022 was \$7.05 per thousand cubic feet, compared with \$3.25 in the 2021 period. The average natural gas realization in the first nine months of 2022 was \$5.76 per thousand cubic feet, compared with \$2.53 in the 2021 period.

Net oil-equivalent production of 1.18 million barrels per day in third quarter 2022 was up 49,000 barrels per day, or 4 percent, from a year earlier. The quarterly increase was primarily due to the absence of third quarter 2021 weather related impacts in the Gulf of Mexico and net production increases in the Permian Basin, partially offset by impacts from the sale of Eagle Ford assets. Net oil-equivalent production of 1.18 million barrels per day in the first nine months of 2022 was up 64,000 barrels per day, or 6 percent, from a year earlier. The year-to-date increase was primarily due to net production increases in the Permian Basin.

The net liquids component of oil-equivalent production of 891,000 barrels per day in third quarter 2022 was up 6 percent from the corresponding 2021 period. The net liquids component of oil-equivalent production of 886,000 barrels per day in the first nine months of 2022 was up 6 percent from the corresponding 2021 period. Net natural gas production of 1.71 billion cubic feet per day in third quarter 2022 was in line with the 2021 comparative period. Net natural gas production was 1.75 billion cubic feet per day in the first nine months of 2022, an increase of 4 percent from the 2021 period.

	Three Months Ended September 30				Nine Months Ended September 30			
	2022		2021		2022		2021	
	(Millions				ollars)			
International Upstream Earnings*	\$ \$ 5,909		3,173	\$	14,794	\$	6,314	
* Includes foreign currency effects	\$ 440	\$	285	\$	899	\$	311	

International upstream operations earned \$5.9 billion in third quarter 2022, compared with \$3.2 billion a year ago. The increase in earnings was primarily due to higher realizations of \$2.7 billion, partially offset by lower sales volumes of \$280 million. Foreign currency effects had a favorable impact on earnings of \$155 million between periods.

International upstream operations earned \$14.8 billion in the first nine months of 2022, compared with \$6.3 billion a year ago. The increase in earnings was primarily due to higher realizations of \$8.2 billion and

asset sale gains of \$200 million, partially offset by lower sales volumes of \$1.1 billion. Foreign currency effects had a favorable impact on earnings of \$588 million between periods.

The average sales price for crude oil and natural gas liquids in third quarter 2022 was \$89 per barrel, up from \$68 a year earlier. The average sales price for crude oil and natural gas liquids in the first nine months of 2022 was \$95 per barrel, up from \$62 a year earlier. The average sales price of natural gas was \$10.36 per thousand cubic feet in third quarter 2022, compared with \$6.28 in the 2021 period. The average sales price of natural gas was \$9.56 per thousand cubic feet in the first nine months of 2022, compared with \$5.30 in the 2021 period.

Net oil-equivalent production of 1.85 million barrels per day in third quarter 2022 was down 56,000 barrels per day from third quarter 2021. Net oil-equivalent production of 1.82 million barrels per day in the first nine months of 2022 was down 163,000 barrels per day, or 8 percent, from a year earlier. The decrease for both quarterly and year-to-date periods was primarily due to lower production following expiration of the Erawan concession in Thailand and Rokan concession in Indonesia, partially offset by the absence of third quarter 2021 planned turnaround impacts at TCO.

The net liquids component of oil-equivalent production of 816,000 barrels per day in third quarter 2022 decreased 11 percent from the 2021 period. The net liquids component of oil-equivalent production of 824,000 barrels per day in the first nine months of 2022 decreased 16 percent from the 2021 period. Net natural gas production of 6.21 billion cubic feet per day in third quarter 2022 increased 4 percent from the 2021 period. Net natural gas production of 5.96 billion cubic feet per day in the first nine months of 2022 decreased 1 percent from the 2021 period.

Downstream

Three Months Ended September 30				Nine Months Ended September 30						
2	2022 2021				2022	2021				
(Millions o				of dolla	ars)					
\$	1,288	\$	1,083	\$	4,214	\$	1,729			

U.S. downstream reported earnings of \$1.3 billion in third quarter 2022, compared with \$1.1 billion a year earlier. The increase was mainly due to higher margins on refined product sales of \$940 million, partially offset by lower earnings from the 50 percent-owned Chevron Phillips Chemical Company of \$390 million and higher operating expenses of \$360 million largely associated with planned turnarounds.

U.S. downstream reported earnings of \$4.2 billion in the first nine months of 2022, compared with \$1.7 billion a year earlier. The increase was mainly due to higher margins on refined product sales of \$3.6 billion, partially offset by higher operating expenses of \$660 million and lower earnings from the 50 percent-owned Chevron Phillips Chemical Company of \$480 million.

Refinery crude oil input in third quarter 2022 decreased 13 percent to 779,000 barrels per day and for the first nine months of 2022, crude oil input decreased 6 percent to 858,000 barrels per day from the corresponding 2021 period. The decrease in both quarterly and year-to-date periods was primarily due to planned turnarounds.

Refined product sales in third quarter 2022 were up 5 percent to 1.25 million barrels per day and for the first nine months of 2022, refined product sales were up 8 percent to 1.23 million barrels per day from the corresponding 2021 periods. The increase for both quarterly and nine-month periods was mainly due to higher renewable fuel sales following the Renewable Energy Group, Inc. acquisition and higher jet fuel demand as travel restrictions associated with the COVID-19 pandemic continue to ease.

	Three Months Ended September 30					Nine Months Ended September 30

International Downstream Earnings*	\$ \$ 1,242		227	\$	2,169	\$	425		
* Includes foreign currency effects	\$ 179	\$	123	\$	347	\$	183		

International downstream reported earnings of \$1.2 billion in third quarter 2022, compared with \$227 million a year earlier. The increase in earnings was mainly due to higher margins on refined product sales of \$1.1 billion and a favorable swing in foreign currency effects of \$56 million between periods.

International downstream reported earnings of \$2.2 billion in the first nine months of 2022, compared with \$425 million a year earlier. The increase in earnings was mainly due to higher margins on refined product sales of \$2.0 billion and a favorable swing in foreign currency effects of \$164 million between periods, partially offset by higher operating expenses of \$460 million.

Refinery crude oil input of 651,000 barrels per day in third quarter 2022 increased 11 percent from the year-ago period. For the first nine months of 2022, crude oil input was 635,000 barrels per day, up 12 percent from the year-ago period. The increase for both the quarterly and year-to-date periods was due to increased refinery runs in response to higher demand.

Total refined product sales in third quarter 2022 were up 4 percent to 1.44 million barrels per day and for the first nine months of 2022, refined product sales were up 4 percent to 1.37 million barrels per day from the corresponding 2021 periods. The increase for both quarterly and nine-month periods was mainly due to higher jet fuel demand as travel restrictions associated with the COVID-19 pandemic continue to ease.

Earnings/(Charges)*	\$	\$ (606) \$ (334)			\$	(2,069)	\$	(2,247)			
* Includes foreign currency effects	\$	5	\$	(103)	\$	(172)	\$	(148)			

All Other consists of worldwide cash management and debt financing activities, corporate administrative functions, insurance operations, real estate activities and technology companies.

Net charges in third quarter 2022 were \$606 million, compared to \$334 million a year earlier. The increase in net charges between periods was mainly due to the absence of third quarter 2021 favorable tax items and higher current quarter pension settlement expenses, partially offset by higher interest income from higher cash balances and lower debt interest expenses. Foreign currency effects decreased net charges by \$108 million between periods.

Net charges in the first nine months of 2022 were \$2.1 billion, compared to \$2.2 billion a year earlier. The decrease in net charges between periods was mainly due to lower employee benefit costs, pension settlement expense, and interest expense, partially offset by the absence of 2021 favorable tax items and an unfavorable swing of \$24 million in foreign currency effects.

Consolidated Statement of Income

Explanations of variations between periods for selected income statement categories are provided below:

	Three Months Ended September 30						ine Months Ended September 30				
		2022 2021				2022		2021			
	(Millions					s of dollars)					
Sales and other operating revenues	\$	63,508	\$	42,552	\$	181,194	\$	109,745			

Sales and other operating revenues increased \$21.0 billion for the third quarter and \$71.4 billion for the nine-month period mainly due to higher refined product, crude oil and natural gas prices.

	Three Months Ended September 30					Nine Months Ended September 30			
	2022			2021		2022		2021	
	(Millions o			s of dollars)					
Income from equity affiliates	\$	2,410	\$	1,647	\$	6,962	\$	4,000	

Income from equity affiliates in the third quarter and nine-month period increased mainly due to higher upstream-related earnings from TCO in Kazakhstan and Angola LNG and higher downstream-related earnings from GS Caltex in South Korea, partially offset by lower earnings from CPChem.

	Three Months Ended September 30					Nine Months Ended September 30				
	2022 2021				2022	2021				
	(Millions of				of dollars)					
Other income (loss)	\$ 726	\$	511	\$	1,623	\$	591			

Other income for the third quarter increased due to a favorable swing in foreign currency effects and higher interest income, partially offset by lower gains on asset sales. Other income for the nine-month period increased due to a favorable swing in foreign currency effects, higher gains on asset sales and higher interest income.

	Three Months Ended September 30					Nine Mon Septen				
	2022 2021				2022	2021				
		(Millions o			ns of dollars)					
Purchased crude oil and products	\$	38,090	\$	23,834	\$	110,742	\$	62,031		

Purchased crude oil and products increased \$14.3 billion for the third quarter and \$48.7 billion for the nine-month period primarily due to higher crude oil, natural gas and refined product prices.

		Three Months I September			Nine Months Ended September 30			
		2022	2021		2022		2021	
	-		(Millions	of dollars)				
Operating, selling, general and administrative expenses	\$	7,385 \$	6,010	\$	21,171	\$	17,962	

Operating, selling, general and administrative expenses in the third quarter increased \$1.4 billion primarily due to higher transportation expenses, costs associated with planned refinery turnarounds, and higher employee benefit expenses. Operating, selling, general and administrative expenses in the ninemonth period increased \$3.2 billion primarily due to higher transportation expenses, an early contract termination charge at Sabine Pass, and costs associated with planned refinery turnarounds.

		Three Months Ended September 30					Nine Months Ended September 30				
	2022 2021				2022	2021					
	(Millions o				of do	ollars)					
Exploration expenses	\$	116	\$	158	\$	521	\$		357		

Exploration expenses in the third quarter decreased primarily due to lower charges for well write-offs. Exploration expenses for the nine-month period increased primarily due to higher charges for well write-offs.

	Three Months Ended September 30				nded 80		
	2022 2021		2021	2022			2021
		(Millions	of doll	ars)			
Depreciation, depletion and amortization	\$ 4,201	\$	4,304	\$	11,555	\$	13,112

Depreciation, depletion and amortization expenses for the third quarter and nine-month period decreased primarily due to lower rates and lower production.

	Three Months Ended September 30				nded 0		
	2022 2021		2022			2021	
	 (Millions of dollars)						
Taxes other than on income	\$ 1,707	\$	2,075	\$	5,272	\$	5,061

Taxes other than on income for the third quarter decreased mainly due to lower excise taxes, partially offset by higher taxes on production and property taxes. Taxes other than on income in the nine-month period were higher mainly due to higher taxes on production and property taxes, partially offset by lower excise taxes.

	Three Months Ended September 30				nded 0		
	2022 2021		2022			2021	
	(Millions				lars)		
Interest and debt expense	\$ 128	\$	174	\$	393	\$	557

Interest and debt expenses for the third quarter and the nine-month period decreased mainly due to lower debt balances.

	Three M Septe	onths E			Nine Mon Septen			
	2022		2021		2022	2021	_	
			(Millions	of doll	ars)		_	
Other components of net periodic benefit costs	\$ 208	\$	100	\$	259	\$ 602		

Other components of net periodic benefit costs for the third quarter increased primarily due to higher pension settlement costs. Other components of net periodic benefit costs for the nine-month period decreased mainly due to lower pension settlement costs as fewer lump-sum pension distributions were made in the current year.

	September 30				Nine Months Ended September 30				
	 2022		2021	2022			2021		
			(Millions	of dolla	rs)				
Income tax expense/(benefit)	\$ 3,571	\$	1,940	\$	10,636	\$	4,047		

The increase in income tax expense for third quarter 2022 of \$1.6 billion is consistent with the increase in total income before tax for the company of \$6.8 billion.

U.S. income before tax increased from \$3.0 billion in third quarter 2021 to \$5.3 billion in third quarter 2022. This \$2.3 billion increase in income was primarily driven by higher realizations and downstream margins. The increase in income had a direct impact on the company's U.S. income tax resulting in an increase in tax expense of \$0.9 billion between year-over-year periods, from \$355 million in 2021 to \$1.2 billion in 2022.

Table of Contents

International income before tax increased from \$5.0 billion in third quarter 2021 to \$9.5 billion in third quarter 2022. This \$4.5 billion increase in income was primarily driven by higher realizations and downstream margins. The increase in income primarily drove the \$0.8 billion increase in international income tax expense between year-over-year periods, from \$1.6 billion in 2021 to \$2.4 billion in 2022.

The company's increase in income tax expense for the first nine months of 2022 of \$6.6 billion was primarily due to the increase in the total before-tax income in 2022 of \$25.2 billion.

U.S. income before tax increased between the nine-month periods, from \$4.6 billion in 2021 to \$16.0 billion in 2022. This \$11.4 billion increase in income was primarily driven by higher realizations and downstream margins. The increase in income had a direct impact on the company's U.S. income tax resulting in an increase in tax expense of \$2.9 billion between the nine-month periods, from \$770 million in 2021 to \$3.7 billion in 2022.

International income before tax increased for the nine-month period, from \$10.0 billion in 2021 to \$23.8 billion in 2022. This \$13.8 billion increase in income was primarily due to higher realizations and downstream margins. The increase in income primarily drove the \$3.7 billion increase in international income tax expense between year-over-year periods, from \$3.3 billion in 2021 to \$6.9 billion in 2022.

Additional information related to the company's effective income tax rate is included in Note 10 Income Taxes to the Consolidated Financial Statements.

Liquidity and Capital Resources

Cash, cash equivalents and marketable securities totaled \$15.4 billion at September 30, 2022 and \$5.7 billion at year-end 2021. Cash provided by operating activities in the first nine months of 2022 was \$37.1 billion, compared with \$19.7 billion in the year-ago period. Cash provided by financing activities includes proceeds from shares issued for stock option exercises of \$5.5 billion in the first nine months of 2022, compared with \$388 million in the year-ago period. Future cash proceeds from options exercises are expected to be lower. Capital and exploratory expenditures totaled \$8.2 billion in the first nine months of 2022, up \$2.4 billion from the year-ago period. Proceeds and deposits related to asset sales and returns of investment totaled \$1.4 billion and \$1.1 billion, respectively, in the first nine months of 2022, compared to \$563 million and \$23 million, respectively, in the year-ago period. The returns of investment in the first nine months of 2022 were primarily from Angola LNG. As of third quarter 2022, Angola LNG distributions were, and are expected to continue to be, reflected in cash flow from operations.

Dividends The company paid dividends of \$8.3 billion to common stockholders during the first nine months of 2022. In October 2022, the company declared a quarterly dividend of \$1.42 per common share, payable in December 2022.

Debt and Finance Lease Liabilities Chevron's total debt and finance lease liabilities were \$23.6 billion at September 30, 2022, down from \$31.4 billion at December 31, 2021 as the company repaid notes that matured during the period and early retired notes that were scheduled to mature in future periods.

The company has access to a commercial paper program as a financing source for working capital or other short-term needs. The outstanding balance for the company's commercial paper program at September 30, 2022 was zero. The company's debt and finance lease liabilities due within one year, consisting primarily of the current portion of long-term debt and redeemable long-term obligations, totaled \$6.2 billion at September 30, 2022, and \$8.0 billion at December 31, 2021. Of these amounts, \$4.0 billion was reclassified to long-term at the end of September 30, 2022. At December 31, 2021, \$7.8 billion was reclassified to long-term. At September 30, 2022, settlement of these obligations was not expected to require the use of working capital within one year, as the company had the intent and the ability, as evidenced by committed credit facilities, to refinance them on a long-term basis.

At September 30, 2022, the company had \$10.1 billion in 364-day committed credit facilities with various major banks that enable the refinancing of short-term obligations on a long-term basis. The credit facilities allow the company to convert any amounts outstanding into a term loan for a period of up to one year. These facilities support commercial paper borrowing and can also be used for general corporate purposes. The company's practice has been to continually replace expiring commitments with new commitments on substantially the same terms, maintaining levels management believes appropriate. Any borrowings under the facilities would be unsecured indebtedness at interest rates based on the London Interbank Offered Rate (LIBOR), or Secured Overnight Financing Rate (SOFR) when LIBOR has permanently or indefinitely ceased or is no longer representative, or an average of base lending rates published by specified banks and on terms reflecting the company's strong credit rating. No borrowings were outstanding under these facilities at September 30, 2022. In addition, the company has an automatic shelf registration statement that expires in August 2023 for an unspecified amount of nonconvertible debt securities issued by Chevron Corporation or CUSA.

The major debt rating agencies routinely evaluate the company's debt, and the company's cost of borrowing can increase or decrease depending on these debt ratings. The company has outstanding bonds issued by Chevron Corporation, CUSA, Texaco Capital Inc. and Noble Energy, Inc. Most of these securities are the obligations of, or guaranteed by, Chevron Corporation and are rated AA- by Standard and Poor's Corporation (S&P) and Aa2 by Moody's Investors Service (Moody's). The company's U.S. commercial paper is rated A-1+ by S&P and P-1 by Moody's. All of these ratings denote high-quality, investment-grade securities.

The company's future debt level is dependent primarily on results of operations, cash that may be generated from asset dispositions, the capital program, lending commitments to affiliates, and shareholder distributions. Based on its high-quality debt ratings, the company believes that it has substantial borrowing capacity to meet unanticipated cash requirements. During extended periods of low prices for crude oil and natural gas and

narrow margins for refined products and commodity chemicals, the company has the flexibility to modify capital spending plans, discontinue or curtail the stock repurchase program, sell assets, and increase borrowings to continue paying the common stock dividend. The company remains committed to retaining high-quality debt ratings.

Summarized Financial Information for Guarantee of Securities of Subsidiaries CUSA issued bonds that are fully and unconditionally guaranteed on an unsecured basis by Chevron Corporation (together, the "Obligor Group"). The tables below contain summary financial information for Chevron Corporation, as Guarantor, excluding its consolidated subsidiaries, and CUSA, as the issuer, excluding its consolidated subsidiaries. The summary financial information of the Obligor Group is presented on a combined basis, and transactions between the combined entities have been eliminated. Financial information for non-guarantor entities has been excluded.

Common Stock Repurchase Program The Board of Directors authorized a stock repurchase program in 2019 with a maximum dollar limit of \$25 billion and no set term limits. As of September 30, 2022, the company had purchased 109.9 million shares for \$14.3 billion, resulting in \$10.7 billion remaining under the authorized program. In the third quarter of 2022, the company repurchased 24.3 million shares for \$3.75 billion. The company currently expects to repurchase \$3.75 billion of shares during the fourth quarter of 2022.

Repurchases may be made from time to time in the open market, by block purchases, in privately negotiated transactions or in such other manner as determined by the company. The timing of the repurchases and the actual amount repurchased will depend on a variety of factors, including the market price of the company's shares, general market and economic conditions, and other factors. The stock repurchase program does not obligate the company to acquire any particular amount of common stock, and it may be discontinued or resumed at any time.

Noncontrolling Interests The company had noncontrolling interests of \$947 million at September 30, 2022 and \$873 million at December 31, 2021. Included within noncontrolling interests is \$142 million at September 30, 2022 and \$135 million at December 31, 2021 of redeemable noncontrolling interest.

Financial Ratios and Metrics

	At September 30, 2022	At December 31, 2021
Current Ratio (1)	1.4	1.3
Debt Ratio	13.0 %	18.4 %
Net Debt Ratio (2)	4.9 %	15.6 %

⁽¹⁾ At September 30, 2022, the book value of inventory was lower than replacement cost.

⁽²⁾ Net Debt Ratio for September 30, 2022 is calculated as short-term debt of \$2.2 billion plus long-term debt of \$21.4 billion (together, "total debt") less cash and cash equivalents of \$15.2 billion and marketable securities of \$267 million as a percentage of total debt less cash and cash equivalents and marketable securities, plus Chevron Corporation Stockholders' Equity of \$158.7 billion. For the December 31, 2021 calculation, please refer to page 47 of Chevron's 2021 Annual Report on Form 10-K.

Pension Obligations Information related to pension plan contributions is included in Note 8 Employee Benefits to the Consolidated Financial Statements.

Capital and Exploratory Expenditures Capital and exploratory expenditures (C&E) is a key performance indicator and provides the company's investment level in its consolidated companies. This metric includes additions to fixed asset or investment accounts along with exploration expense for its consolidated companies. Management uses this metric along with Affiliate C&E (as defined below) to manage allocation of capital across the company's entire portfolio, funding requirements and ultimately shareholder distributions.

Equity affiliate capital and exploratory expenditures (Affiliate C&E) is also a key performance indicator that provides the company's share of investments in its significant equity affiliate companies. This metric includes additions to fixed asset and investment accounts along with exploration expense in the equity affiliate companies' financial statements. Management uses this metric to assess possible funding needs and/or shareholder distribution capacity of the company's equity affiliate companies. Together with C&E, management also uses Affiliate C&E to manage allocation of capital across the company's entire portfolio, funding requirements and ultimately shareholder distributions.

C&E was \$8.2 billion in the first nine months of 2022, compared with \$5.8 billion in the corresponding 2021 period. Additionally, Affiliate C&E, which did not require cash outlays by the company, was \$2.4 billion in the first nine months of 2022 relative to \$2.3 billion in first nine months of 2021.

The components of C&E are presented in the following table:

	Ni	Nine Months Ended September 30

Acquisitions During second quarter 2022, the company acquired all outstanding shares of Renewable Energy Group, Inc. (REG) in an all-cash transaction valued at \$3.15 billion, or \$61.50 per share. The total cash outflow, net of cash acquired, was \$2.86 billion and is not included in the company's C&E.

Contingencies and Significant Litigation

Ecuador Information related to Ecuador matters is included in Note 11 Litigation under the heading "Ecuador."

Climate Change Information related to climate change-related matters is included in Note 11 Litigation under the heading "Climate Change."

Louisiana Information related to Louisiana coastal matters is included in Note 11 Litigation under the heading "Louisiana."

Income Taxes Information related to income tax contingencies is included in Note 10 Income Taxes and in Note 12 Other Contingencies and Commitments under the heading "Income Taxes."

Guarantees Information related to the company's guarantees is included in Note 12 Other Contingencies and Commitments under the heading "Guarantees."

Indemnifications Information related to indemnifications is included in Note 12 Other Contingencies and Commitments under the heading "Indemnifications."

Long-Term Unconditional Purchase Obligations and Commitments, Including Throughput and Take-or-Pay Agreements Information related to the company's long-term unconditional purchase obligations and commitments is included in Note 12 Other Contingencies and Commitments under the heading "Long-Term Unconditional Purchase Obligations and Commitments, Including Throughput and Take-or-Pay Agreements."

Environmental Information related to environmental matters is included in Note 12 Other Contingencies and Commitments under the heading "Environmental."

Other Contingencies Information related to the company's other contingencies is included in Note 12 Other Contingencies and Commitments under the heading "Other Contingencies."

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Information about market risks for the nine months ended September 30, 2022, does not differ materially from that discussed under Item 7A of Chevron's 2021 Annual Report on Form 10-K.

Item 4. Controls and Procedures

(a) Evaluation of disclosure controls and procedures

The company's management has evaluated, with the participation of the Chief Executive Officer and Chief Financial Officer, the effectiveness of the company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this report. Based on this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the company's disclosure controls and procedures were effective as of September 30, 2022.

(b) Changes in internal control over financial reporting

During the quarter ended September 30, 2022, there were no changes in the company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the company's internal control over financial reporting.

PART II

OTHER INFORMATION

Item 1. Legal Proceedings

Governmental Proceedings The following is a description of legal proceedings that involve governmental authorities as a party and the company reasonably believes would result in \$1.0 million or more of monetary sanctions, exclusive of interest and costs, under federal, state and local laws that have been enacted or adopted regulating the discharge of materials into the environment or primarily for the purpose of protecting the environment. The following proceedings include those matters relating to third quarter 2022 and any material developments with respect to matters previously reported in Chevron's 2021 Annual Report on Form 10-K.

As previously disclosed, the refinery in Pasadena, Texas acquired by Chevron on May 1, 2019 (Pasadena Refining System, Inc. and PRSI Trading LLC) had multiple outstanding Notices of Violation (NOVs) that were issued by the Texas Commission on Environmental Quality related to air emissions at the refinery. The Pasadena refinery negotiated a resolution of the NOVs with the Texas Attorney General, which was approved by the District Court of Travis County, Texas, 53rd Judicial District on July 1, 2022. Resolution of these alleged violations resulted in the payment of a civil penalty of \$1.1 million on July 27, 2022.

Please see information related to other legal proceedings in Note 11 Litigation.

Item 1A. Risk Factors

Some inherent risks could materially impact the company's financial results of operations or financial condition. Information about risk factors for the nine months ended September 30, 2022, does not differ materially from that set forth under the heading "Risk Factors" on pages 20 through 25 of the company's 2021 Annual Report on Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

CHEVRON CORPORATION ISSUER PURCHASES OF EQUITY SECURITIES

Period	Total Number of Shares Purchased ⁽¹⁾⁽²⁾	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Program (2) (Billions of dollars)
July 1 – July 31, 2022	4,949,041	\$142.93	4,948,817	\$13.7
August 1 – August 31, 2022	12,284,431	\$158.55	12,283,436	\$11.8
September 1 – September 30, 2022	7,091,112	\$154.45	7,090,450	\$10.7
Total	24,324,584	\$154.18	24,322,703	

⁽¹⁾ Includes common shares repurchased from participants in the company's deferred compensation plans for personal income tax withholdings.

Item 5. Other Information

Rule 10b5-1 Plan Elections

Pierre R. Breber, Vice President and Chief Financial Officer, entered into a pre-arranged stock trading plan in August 2022. Mr. Breber's plan provides for the potential exercise of vested stock options and the associated sale of up to 25,000 shares of Chevron common stock between November 2022 and August 2023.

James W. Johnson, Executive Vice President, Senior Advisor, entered into a pre-arranged stock trading plan in August 2022. Mr. Johnson's plan provides for the potential exercise of vested stock options and the associated sale of up to 183,666 shares of Chevron common stock between November 2022 and January 2023.

These trading plans were entered into during an open insider trading window and are intended to satisfy Rule 10b5-1(c) under the Securities Exchange Act of 1934, as amended, and Chevron's policies regarding transactions in Chevron securities.

⁽²⁾ Refer to "Liquidity and Capital Resources" for additional information regarding the company's authorized stock repurchase program.

David A. Inchausti, Vice President and Controller (Principal Accounting Officer and Duly Authorized Officer)

RULE 13a-14(a)/15d-14(a) CERTIFICATION PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Michael K. Wirth, certify that:

- 1. I have reviewed this Quarterly Report on Form 10-Q of Chevron Corporation;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(f)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
