- **Adds 10% to oil equivalent proved reserves for under \$7 per barrel**
- **Accretive to earnings per share and return on capital employed (ROCE)**
- **Expected to add \$1 billion to annual free cash flow**

**SAN RAMON, Calif. and DENVER, Colo., May 22, 2023** — Chevron Corporation (NYSE: CVX) announced today that it has entered into a definitive agreement with PDC Energy, Inc. (NASDAQ: PDCE) to acquire all of the outstanding shares of PDC in an all-stock transaction valued at \$6.3 billion, or \$72 per share. Based on Chevron's closing price on May 19, 2023 and under the terms of the agreement, PDC shareholders will receive 0.4638 shares of Chevron for each PDC share. The total enterprise value, including debt, of the transaction is \$7.6 billion.

The acquisition of PDC provides Chevron with high-quality assets expected to deliver higher returns in lower carbon intensity basins in the United States. PDC brings strong free cash flow, low breakeven production and development opportunities adjacent to Chevron's position in the Denver-Julesburg (DJ) Basin, as well as additional acreage to Chevron's leading position in the Permian Basin.

"PDC's attractive and complementary assets strengthen Chevron's position in key U.S. production basins," said Chevron Chairman and CEO Mike Wirth. "This transaction is accretive to all important financial measures and enhances Chevron's objective to safely deliver higher returns and lower carbon. We look forward to welcoming PDC's team and shareholders to Chevron and continuing both companies' focus on safe and reliable operations."

"The combination with Chevron is a great opportunity for PDC to maximize value for our shareholders. It provides a global portfolio of best-in-class assets," said Bart Brookman, PDC President and CEO. "I look forward to blending our highly complementary organizations, and I'm excited that PDC's assets will help propel Chevron toward our shared goal for a lower carbon energy future."

#### Transaction Benefits

- **Accretive to earnings per share, free cash flow and ROCE:** Chevron anticipates the transaction to be accretive to all key financial measures within the first year after closing and to add about \$1 billion in annual free cash flow at \$70 per barrel Brent and \$3.50 per Mcf Henry Hub (approximate 2024 futures prices as of May 2023).
- **Strong strategic fit:** Increases Chevron's proved reserves by 10% at an acquisition cost under \$7 per barrel of oil equivalent (BOE).
  - DJ Basin – 275,000 net acres adjacent to Chevron's existing operations that add over 1 billion BOE of proved reserves in highly economic locations and enable capital and operational synergies.
  - Permian Basin – 25,000 net acres that are held by production and will be integrated into Chevron's existing capital efficient development operations.

- **Capital and cost efficient:**
  - Capital expenditures – Chevron expects to increase capex by ~\$1 billion per year, raising its guidance range to \$14 to \$16 billion through 2027, after realizing about \$400 million in capex efficiencies post-closing.
  - Operational expenditures – the transaction is expected to achieve run-rate cost synergies of around \$100 million before tax within a year of closing.
