the human energy company™ Chevron

Chevron 2022 Investor Presentation

June 1, 2022

Cautionary statement

CAUTIONARY STATEMENTS RELEVANT TO FORWARD-LOOKING INFORMATION
FOR THE PURPOSE OF "SAFE HARBOR" PROVISIONS OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

This presentation contains forward-looking statements relating to Chevron's operations and energy transition plans that are based on management's current expectations, estimates and projections about the petroleum, chemicals and other energy-related industries. Words or phrases such as "anticipates," "expects," "intends," "plans," "targets," "advances," "commits," "drives," "aims," "forecasts," "projects," "believes," "approaches," "seeks," "schedules," "estimates," "positions," "pursues," "may," "can," "could," "should," "will," "budgets," "outlook," "trends," "guidance," "focus," "on track," "goals," "objectives," "strategies," "opportunities," "poised," "potential," "ambitions," "aspires" and similar expressions are intended to identify such forward-looking statements. These statements are not guarantees of future performance and are subject to certain risks, uncertainties and other factors, many of which are beyond the company's control and are difficult to predict. Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements. The reader should not place undue reliance on these forward-looking statements, which speak only as of the date of this presentation. Unless legally required, Chevron undertakes no obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise.

Among the important factors that could cause actual results to differ materially from those in the forward-looking statements are: changing crude oil and natural gas prices and demand for the company's products, and production curtailments due to market conditions; crude oil production quotas or other actions that might be imposed by the Organization of Petroleum Exporting Countries and other producing countries; technological advancements; changes to government policies in the countries in which the company operates; public health crises, such as pandemics (including coronavirus (COVID-19)) and epidemics, and any related government policies and actions; disruptions in the company's global supply chain, including supply chain constraints and escalation of the cost of goods and services; changing economic, regulatory and political environments in the various countries in which the company operates; general domestic and international economic, market and political conditions, including the military conflict between Russia and Ukraine and the global response to such conflict; changing refining, marketing and chemicals margins; actions of competitors or regulators; timing of exploration expenses; timing of crude oil liftings; the competitiveness of alternate-energy sources or product substitutes; development of large carbon capture and offset markets; the results of operations and financial condition of the company's suppliers, vendors, partners and equity affiliates, particularly during the COVID-19 pandemic; the inability or failure of the company's joint-venture partners to fund their share of operations and development activities; the potential failure to achieve expected net production from existing and future crude oil and natural gas development projects; potential delays in the development, construction or start-up of planned projects; the potential disruption or interruption of the company's operations due to war, accidents, political events, civil unrest, severe weather, cyber threats, terrorist acts, or other natural or human causes beyond the company's control; the potential liability for remedial actions or assessments under existing or future environmental regulations and litigation; significant operational, investment or product changes undertaken or required by existing or future environmental statutes and regulations, including international agreements and national or regional legislation and regulatory measures to limit or reduce greenhouse gas emissions; the potential liability resulting from pending or future litigation; the company's future acquisitions or dispositions of assets or shares or the delay or failure of such transactions to close based on required closing conditions; the potential for gains and losses from asset dispositions or impairments; government mandated sales, divestitures, recapitalizations, taxes and tax audits, tariffs, sanctions, changes in fiscal terms or restrictions on scope of company operations; foreign currency movements compared with the U.S. dollar; material reductions in corporate liquidity and access to debt markets; the receipt of required Board authorizations to implement capital allocation strategies, including future stock repurchase programs and dividend payments; the effects of changed accounting rules under generally accepted accounting principles promulgated by rule-setting bodies; the company's ability to identify and mitigate the risks and hazards inherent in operating in the global energy industry; and the factors set forth under the heading "Risk Factors" on pages 20 through 25 of the company's 2021 Annual Report on Form 10-K and in subsequent filings with the U.S. Securities and Exchange Commission. Other unpredictable or unknown factors not discussed in this presentation could also have material adverse effects on forward-looking statements.

As used in this presentation, the term "Chevron" and such terms as "the company," "the corporation," "our," "we," "us" and "its" may refer to Chevron Corporation, one or more of its consolidated subsidiaries, or to all of them taken as a whole. All of these terms are used for convenience only and are not intended as a precise description of any of the separate companies, each of which manages its own affairs.

Terms such as "resources" may be used in this presentation to describe certain aspects of Chevron's portfolio and oil and gas properties beyond the proved reserves. For definitions of, and further information regarding, this and other terms, see the "Glossary of Energy and Financial Terms" on pages 24 through 25 of Chevron's 2021 Supplement to the Annual Report available at chevron.com.

This presentation is meant to be read in conjunction with the related transcripts. All materials are posted on chevron.com under the headings "Investors," "Events & Presentations."

the human energy company™ Chevron

Corporate Overview

Mike Wirth
Chairman and Chief Executive Officer

Pierre Breber
Chief Financial Officer

Winning combination

Higher returns

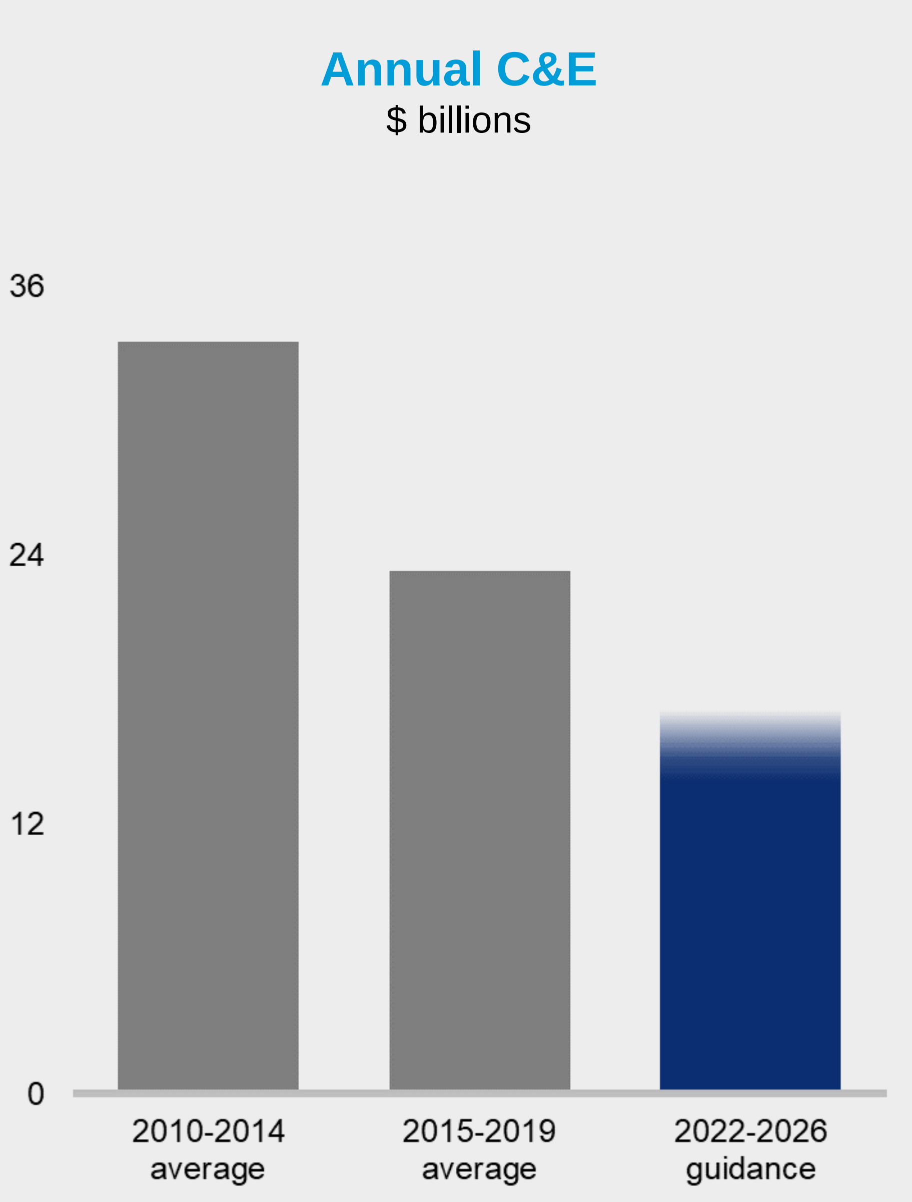
- Advantaged portfolio
- Unmatched financial strength
- Capital and cost discipline
- Superior distributions to shareholders

Lower carbon

- First quartile upstream carbon intensity
- Target harder-to-abate sectors
- Build on capabilities, assets and customers
- Expect high growth

See Appendix for reconciliation of non-GAAP measures and slide notes providing definitions, source information, calculations, and other information.

More capital and cost efficient



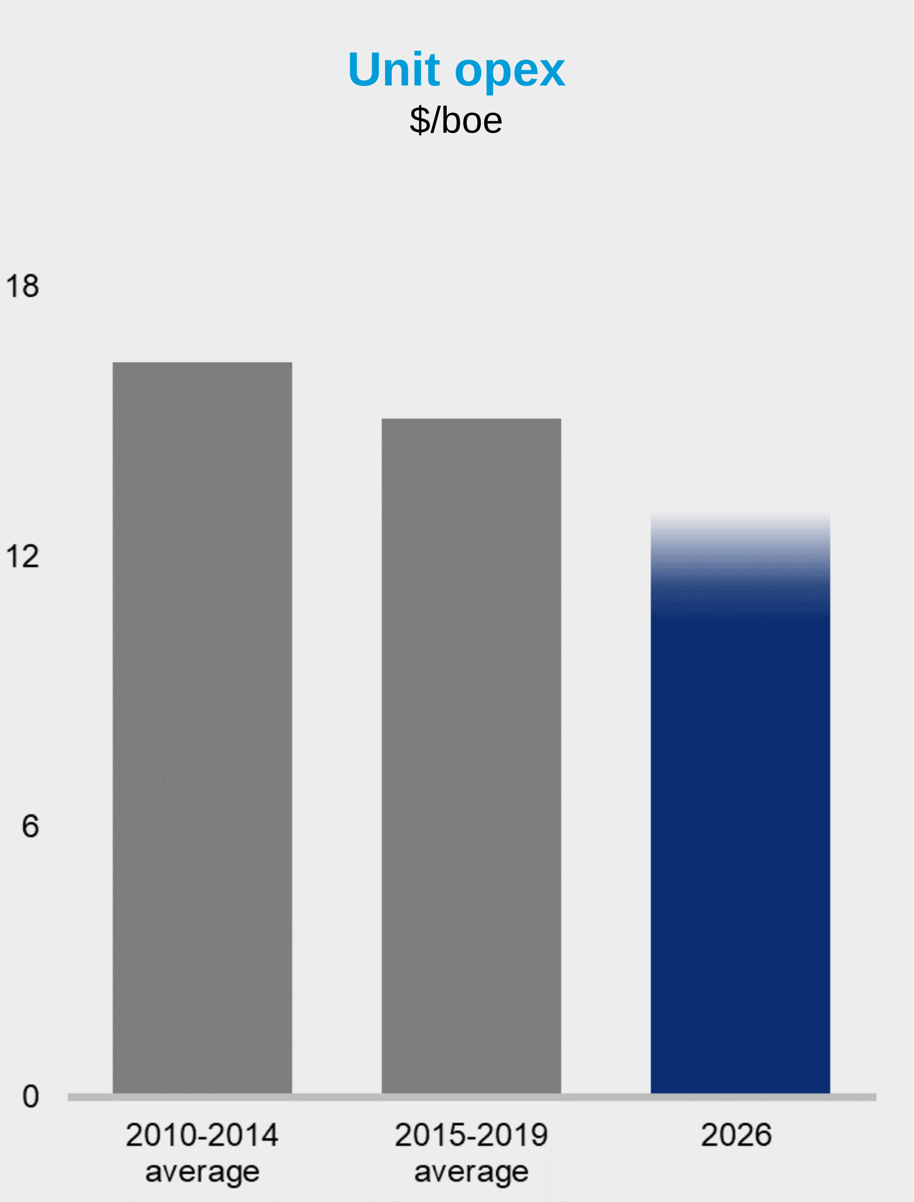
C&E guidance of

$15 - $17B

per year

Target reduction of unit opex

>10% by 2026*



See Appendix for reconciliation of non-GAAP measures and slide notes providing definitions, source information, calculations, and other information.

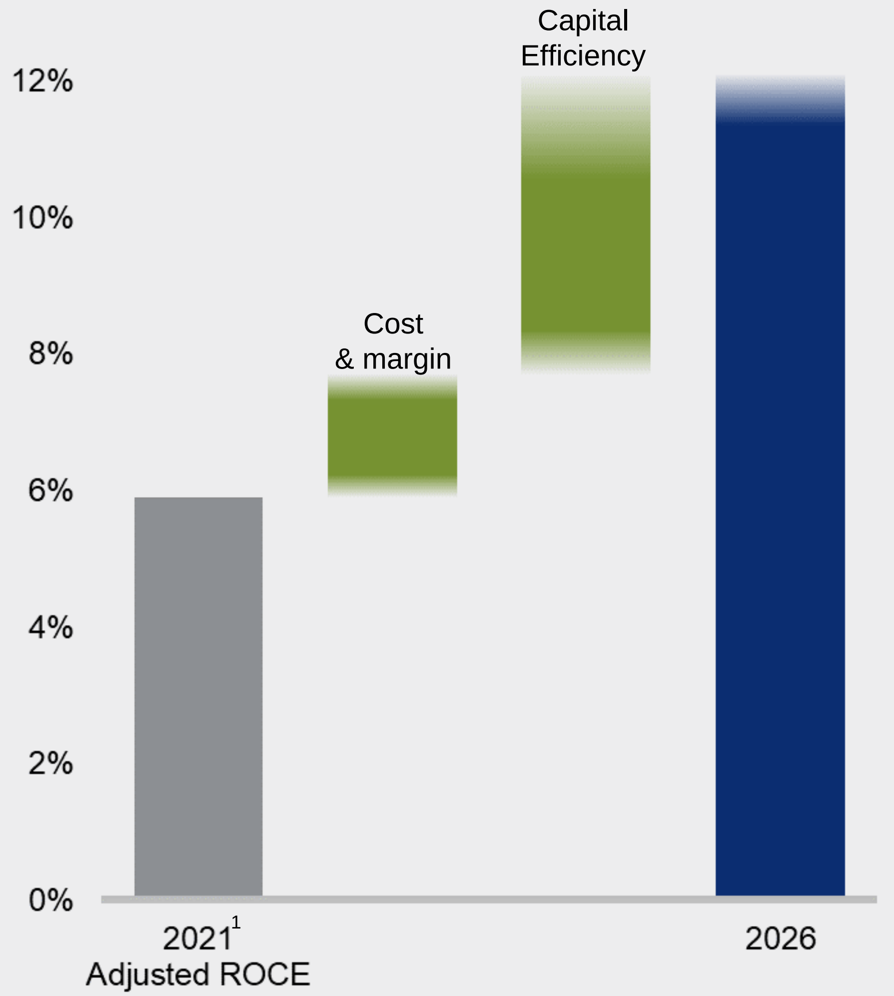
* From 2021 level.

Raising ROCE target

at flat $60 Brent nominal

Adjusted ROCE

at $60 Brent



12% ROCE

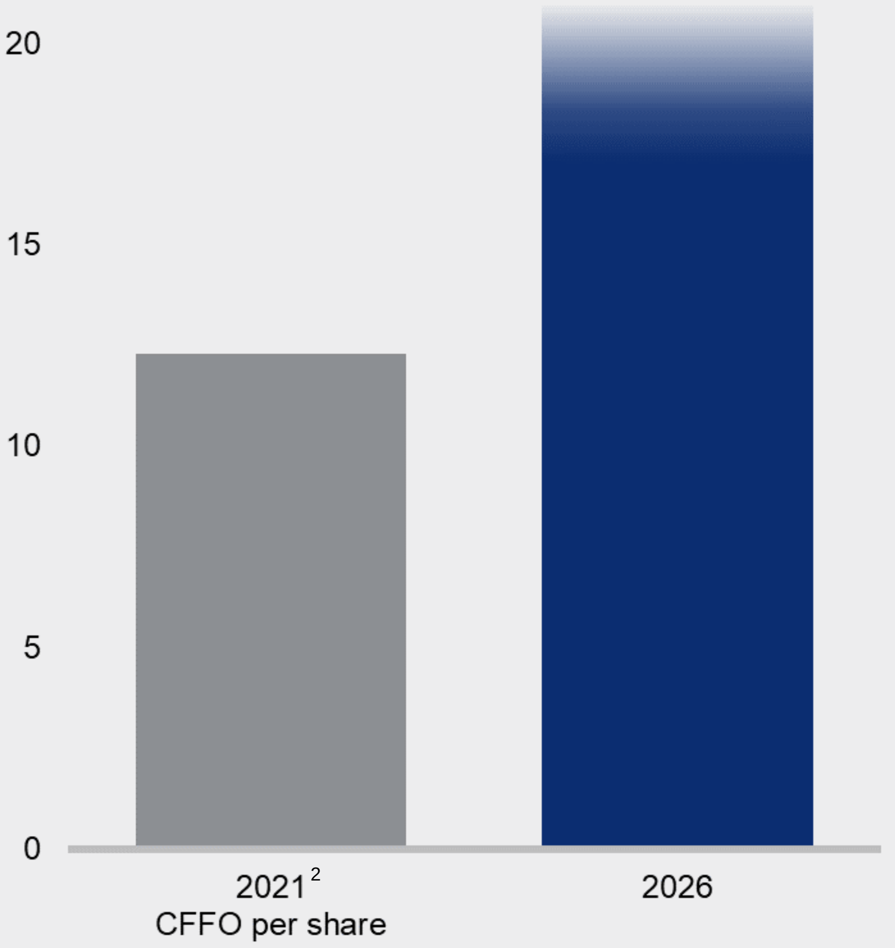
by 2026

>10% CAGR

CFFO per share excl. WC through 2026

CFFO per share excl. working capital

at $60 Brent, $/share



[1] Adjusted ROCE does not include earnings impact of special items and FX. 2021 ROCE is normalized to $60 Brent, $3 Henry Hub, $7 international LNG, and mid-cycle DS&C.
See Appendix for reconciliation of non-GAAP measures and slide notes providing definitions, source information, calculations, and other information.

[2] 2021 CFFO per share excluding working capital is normalized to $60 Brent, $3 Henry Hub, $7 international LNG, and mid-cycle DS&C.

Accelerating lower carbon businesses

Integrating	Investing	Delivering
our capabilities and assets	across the value chain	value to customers

Expected capital expenditures ~$10B through 2028

Projected annual CFFO >$1B end of decade

Estimated >30 MMT enabled CO_2e reductions by 2028

*Total lower carbon capital allocation through 2028 includes $8B for low-carbon investments and $2B for carbon reduction projects.

Advancing our lower carbon future

Lower carbon intensity

Upstream CO_2 intensity reduction target[1]	35% by 2028
Net Zero[2] Upstream Scope 1 & 2 aspiration	By 2050
PCI[1] reduction target[3] Scope 1, 2 & 3[4]	>5% by 2028

Grow new energies

	2030 targets
Renewable fuels	100 MBD
Hydrogen[5]	150 KTPA
Carbon capture & offsets	25 MMTPA

¹ From 2016 baseline.
² Accomplishing this aspiration depends on continuing progress on commercially viable technology; government policy; successful negotiations for CCS and nature-based projects; availability of cost-effective, verifiable offsets in the global market; and granting of necessary permits by governing authorities.
³ PCI – portfolio carbon intensity (PCI) is a metric that represents the carbon intensity across the full value chain associated with bringing products to market. This target is expected to allow Chevron flexibility to grow its traditional upstream and downstream business, provided it remains increasingly carbon-efficient.
⁴ Scope 3 includes emissions from use of products.
⁵ Chevron's approach to hydrogen envisions the use of green, blue and gray hydrogen.

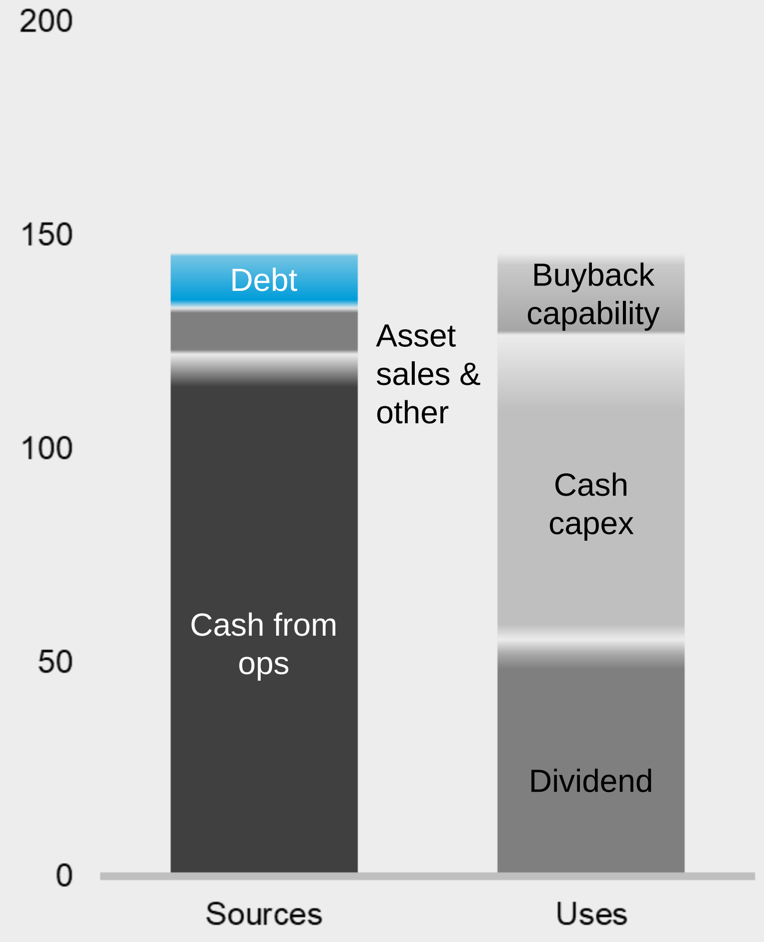
Consistent financial priorities

Maintain and grow dividend	2X dividend per share since 2010
Fund capital program	>20% more capital efficient
Strong balance sheet	<20% net debt ratio
Return surplus cash	$5 - $10B annual buyback guidance

See Appendix for reconciliation of non-GAAP measures and slide notes providing definitions, source information, calculations, and other information.
Refer to Chevron's 2021 Form 10-K for reconciliation of net debt ratio.

Downside resilience and upside leverage

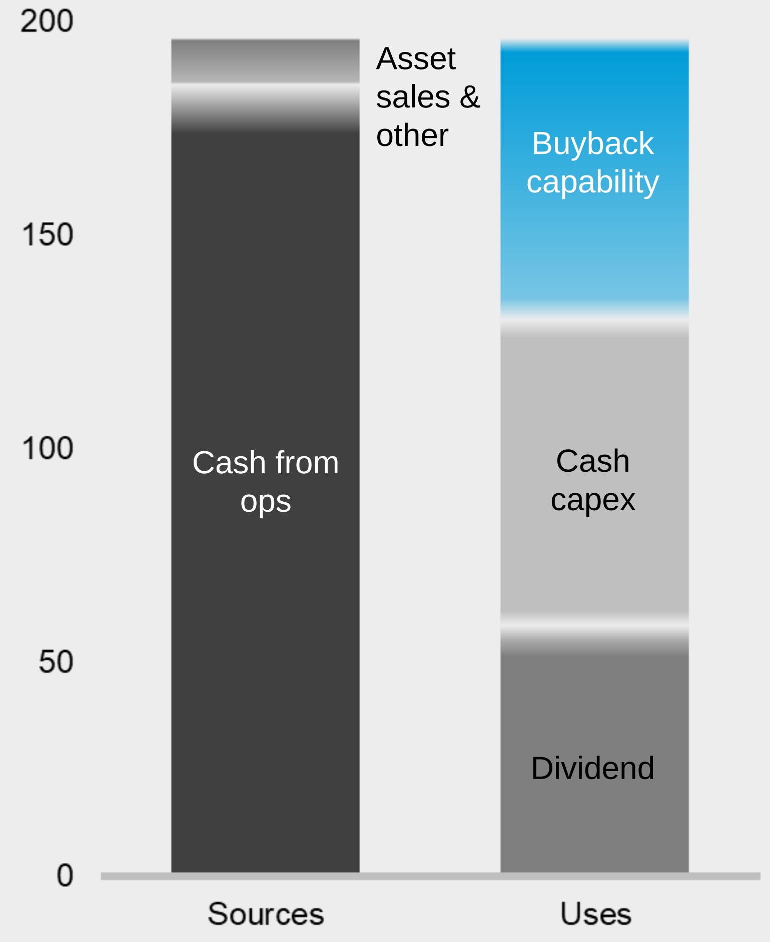
Downside potential
$50 Brent*
$ billions, 2022-2026



Upside potential to buyback **~20%** of shares outstanding

Cash framework balanced at **$50 Brent**

Upside potential
$75 Brent*
$ billions, 2022-2026



* Based on flat nominal prices from 2022 to 2026.

See Appendix for reconciliation of non-GAAP measures and slide notes providing definitions, source information, calculations, and other information.

Winning combination

More efficient	More cash	Lower carbon
Maintain **$15 - $17 billion** in C&E through 2026	Driving to **12%** ROCE by 2026	Target[1] **35% reduction** in Upstream CO_2 intensity by 2028
>10% decrease in unit opex by 2026	**10% CAGR** CFFO per share excl. WC through 2026	100 MBD · 150 KTPA[2] · 25 MMTPA New energies **2030 growth** targets

Note: The figures on this slide represent the company's previously announced guidance and targets relating to its capital and cost efficiency strategy.

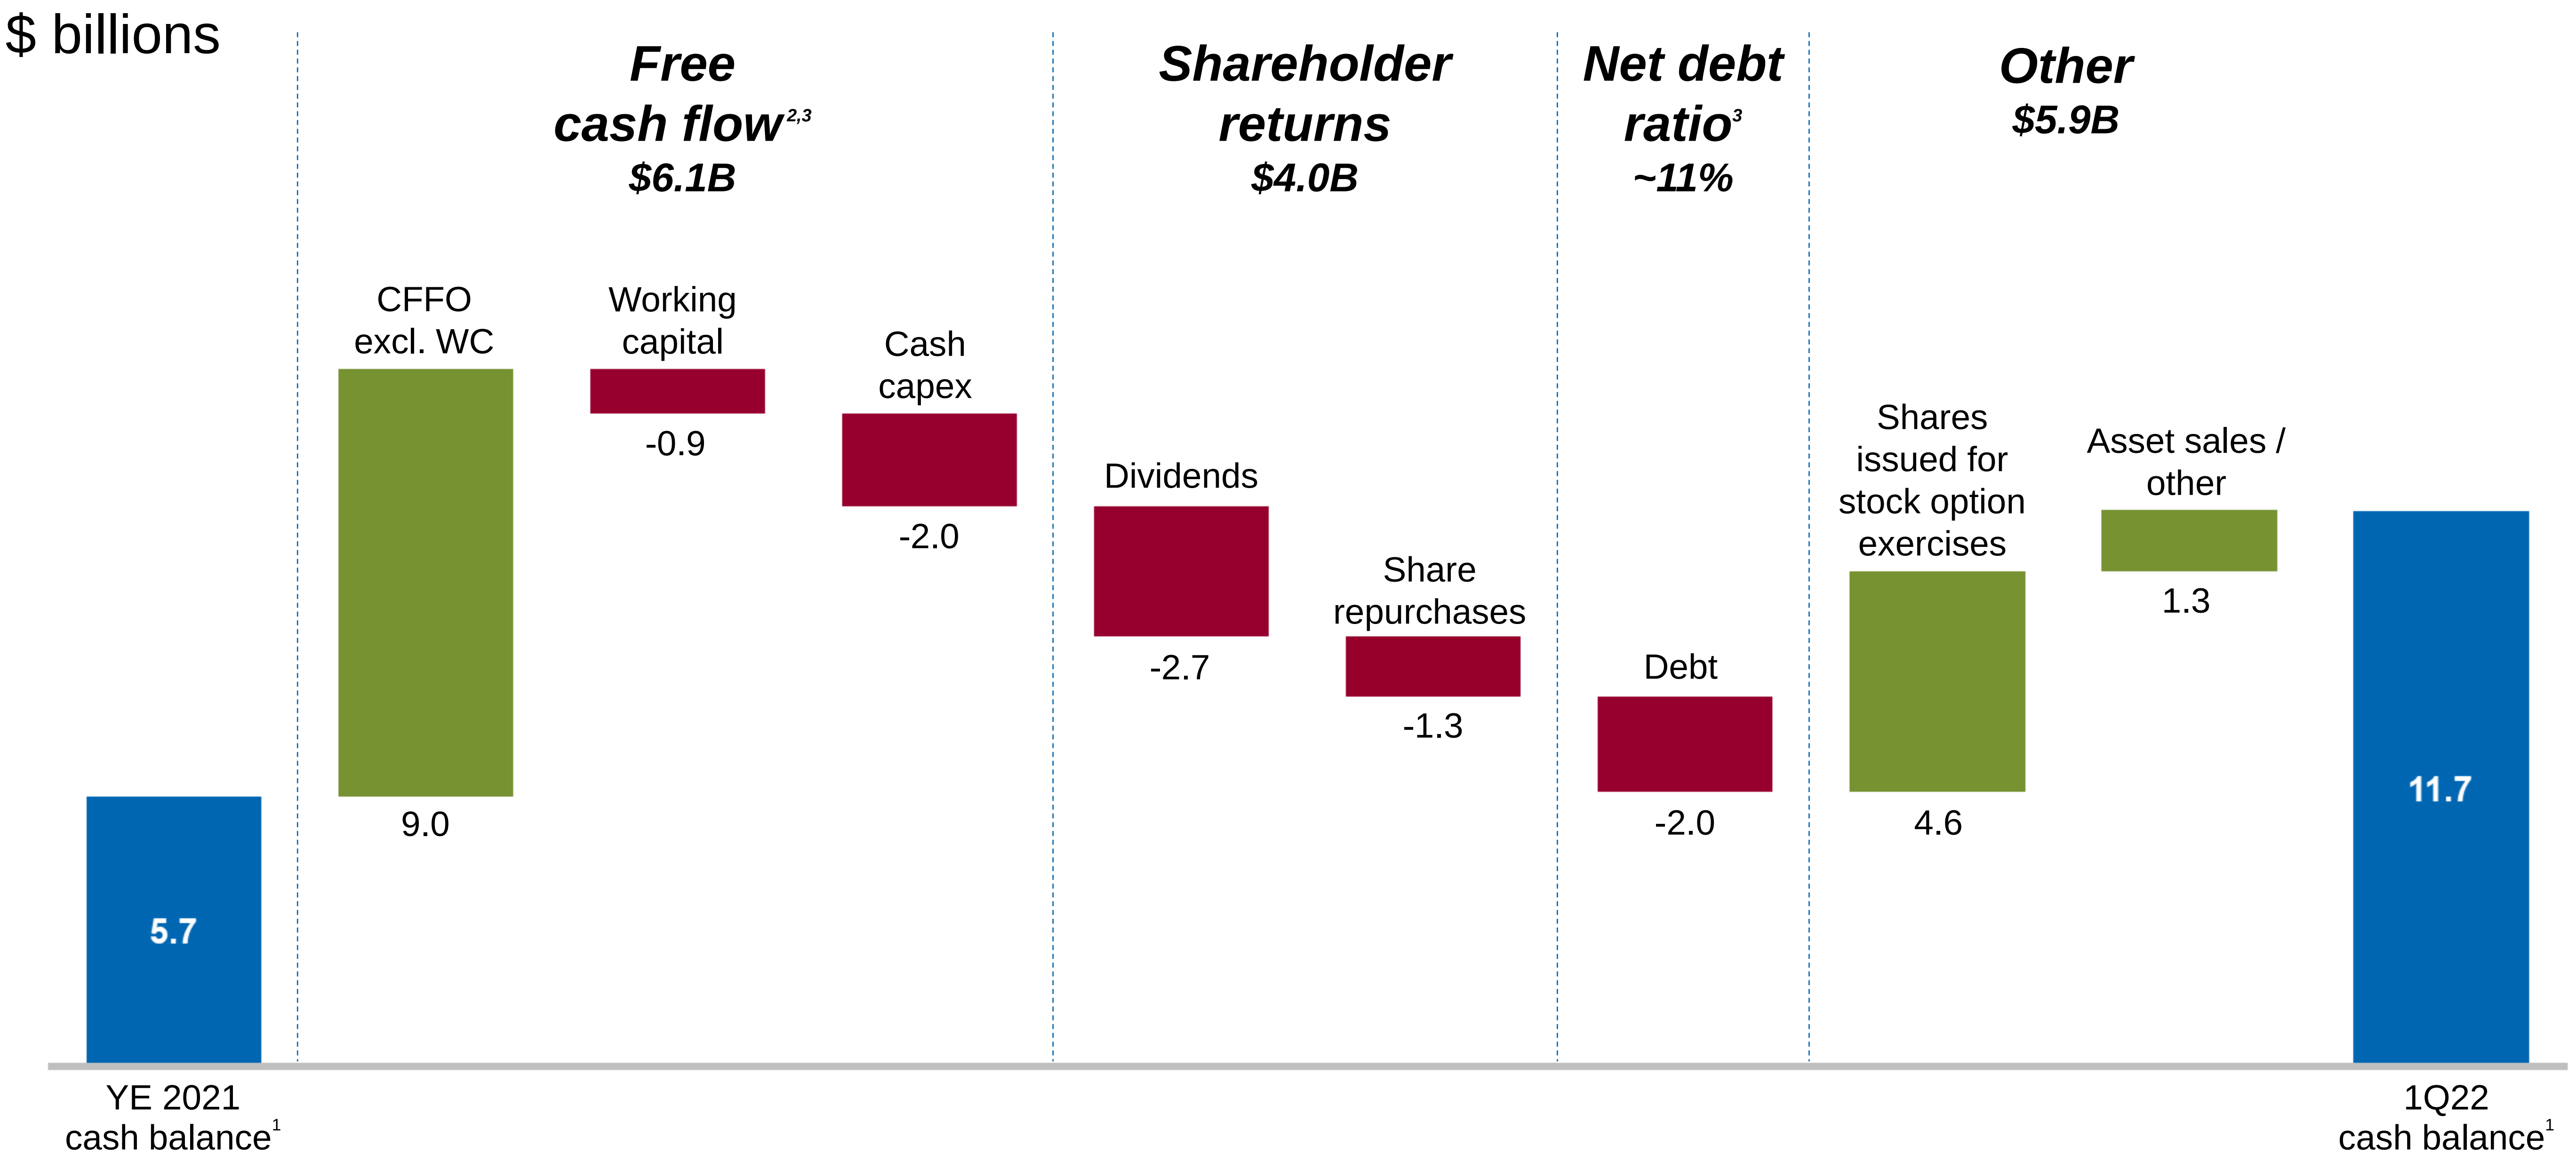
[1] From 2016 baseline.
[2] Chevron's approach to hydrogen envisions the use of green, blue and gray hydrogen.

Financial highlights

	1Q22
Earnings / Earnings per diluted share	$6.3 billion / $3.22
Adjusted Earnings / EPS[1]	$6.5 billion / $3.36
Cash flow from operations / excl. working capital[1]	$8.1 billion / $9.0 billion
Total C&E / Organic C&E	$2.8 billion / $2.7 billion
ROCE / Adjusted ROCE[1,2]	14.7% / 15.4%
Dividends paid	$2.7 billion
Share repurchases	$1.3 billion
Debt ratio / Net debt ratio[1,3]	16.7% / 10.8%

[1] Reconciliation of special items, FX, and other non-GAAP measures can be found in the appendix.
[2] Quarterly ROCE and Adjusted ROCE calculated based on annualized earnings.
[3] As of 3/31/2022. Net debt ratio is defined as debt less cash equivalents and marketable securities divided by debt less cash equivalents and marketable securities plus stockholders' equity.

Consistent financial priorities



[1] Includes cash, cash equivalents and marketable securities. Excludes restricted cash.
[2] Free cash flow is defined as cash flow from operations less cash capital expenditures.
[3] Reconciliation of non-GAAP measures can be found in the appendix.
Note: Numbers may not sum due to rounding.

Looking ahead

Forward guidance

	2Q22	
UPSTREAM	Turnarounds & Downtime: Expiry of Thailand concessions: ALNG Return of Capital*:	~(160) MBOED ~(50) MBOED $250 - $350MM
DOWNSTREAM	Refinery turnarounds (A/T earnings): Bunge JV inorganic cash capex:	$(250) - $(350)MM $600MM
CORPORATE	Share repurchase:	~$2.5B

* ALNG return of capital appears in *Proceeds and deposits related to asset sales and returns of investment* on the Statement of Cash Flows.

A differentiated value proposition

Higher returns

First quarter 2022
14.7% ROCE

Permian production outlook[1]
700 - 750 MBOED

Buyback guidance raised to
$10B annual run rate

Lower carbon

Announced
>$4B lower carbon spend[2]

Progressing
REG and Bunge transactions

First nature-based
GHG offset project

[1] Permian Unconventional expected full-year 2022 production.
[2] Expected full-year 2022 spend.

Upstream & Midstream

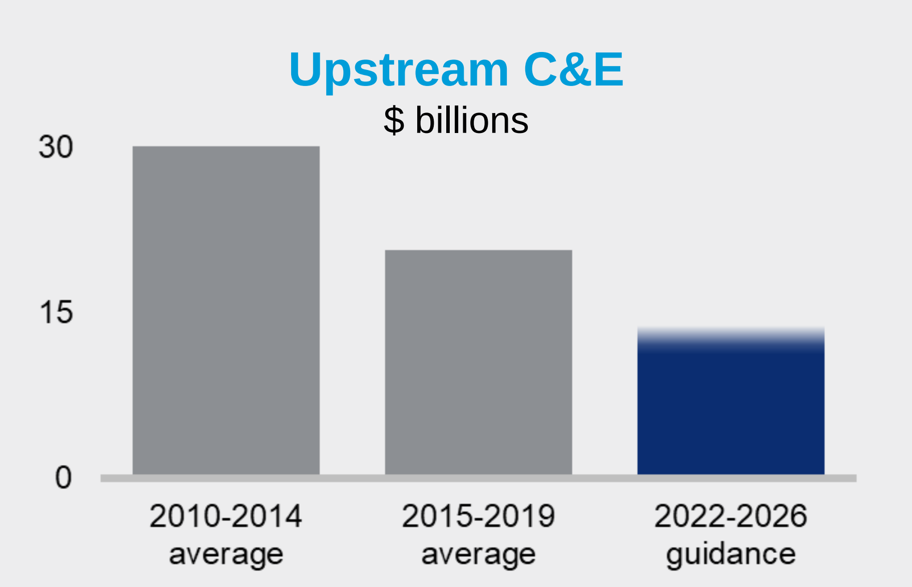
Jay Johnson

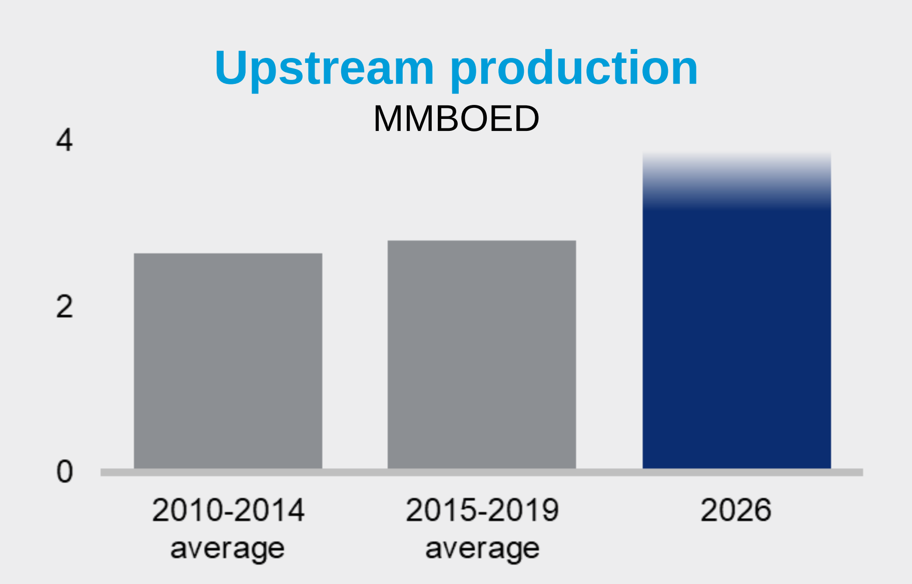
Executive Vice President, Upstream

Colin Parfitt

Vice President, Midstream

Continuing to advance our Upstream business

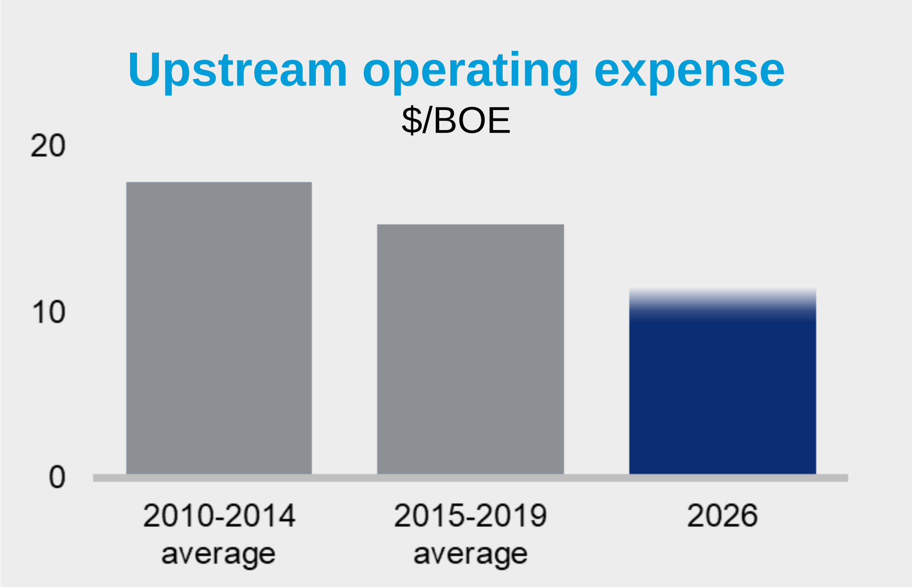


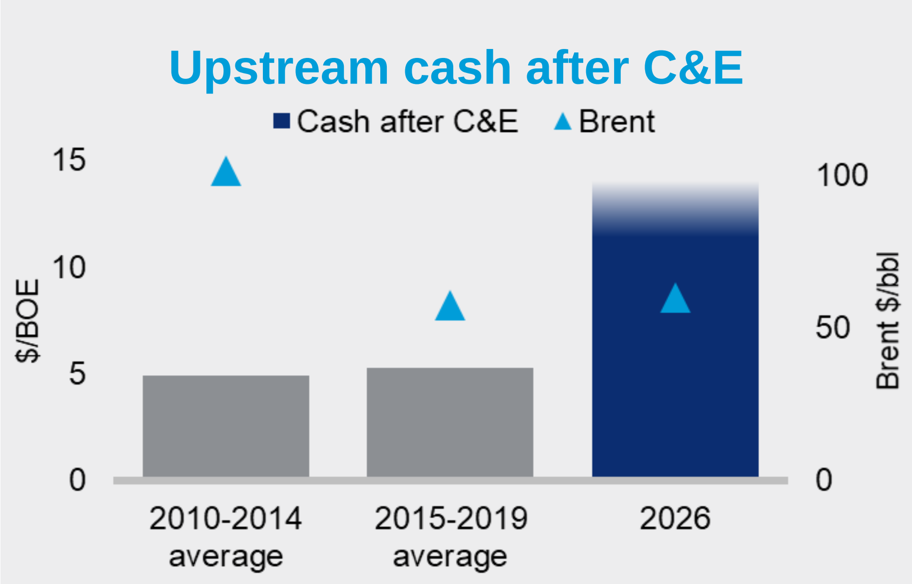


Capital & Cost
efficient

Expect production
growth >3% CAGR

Financial
resilience

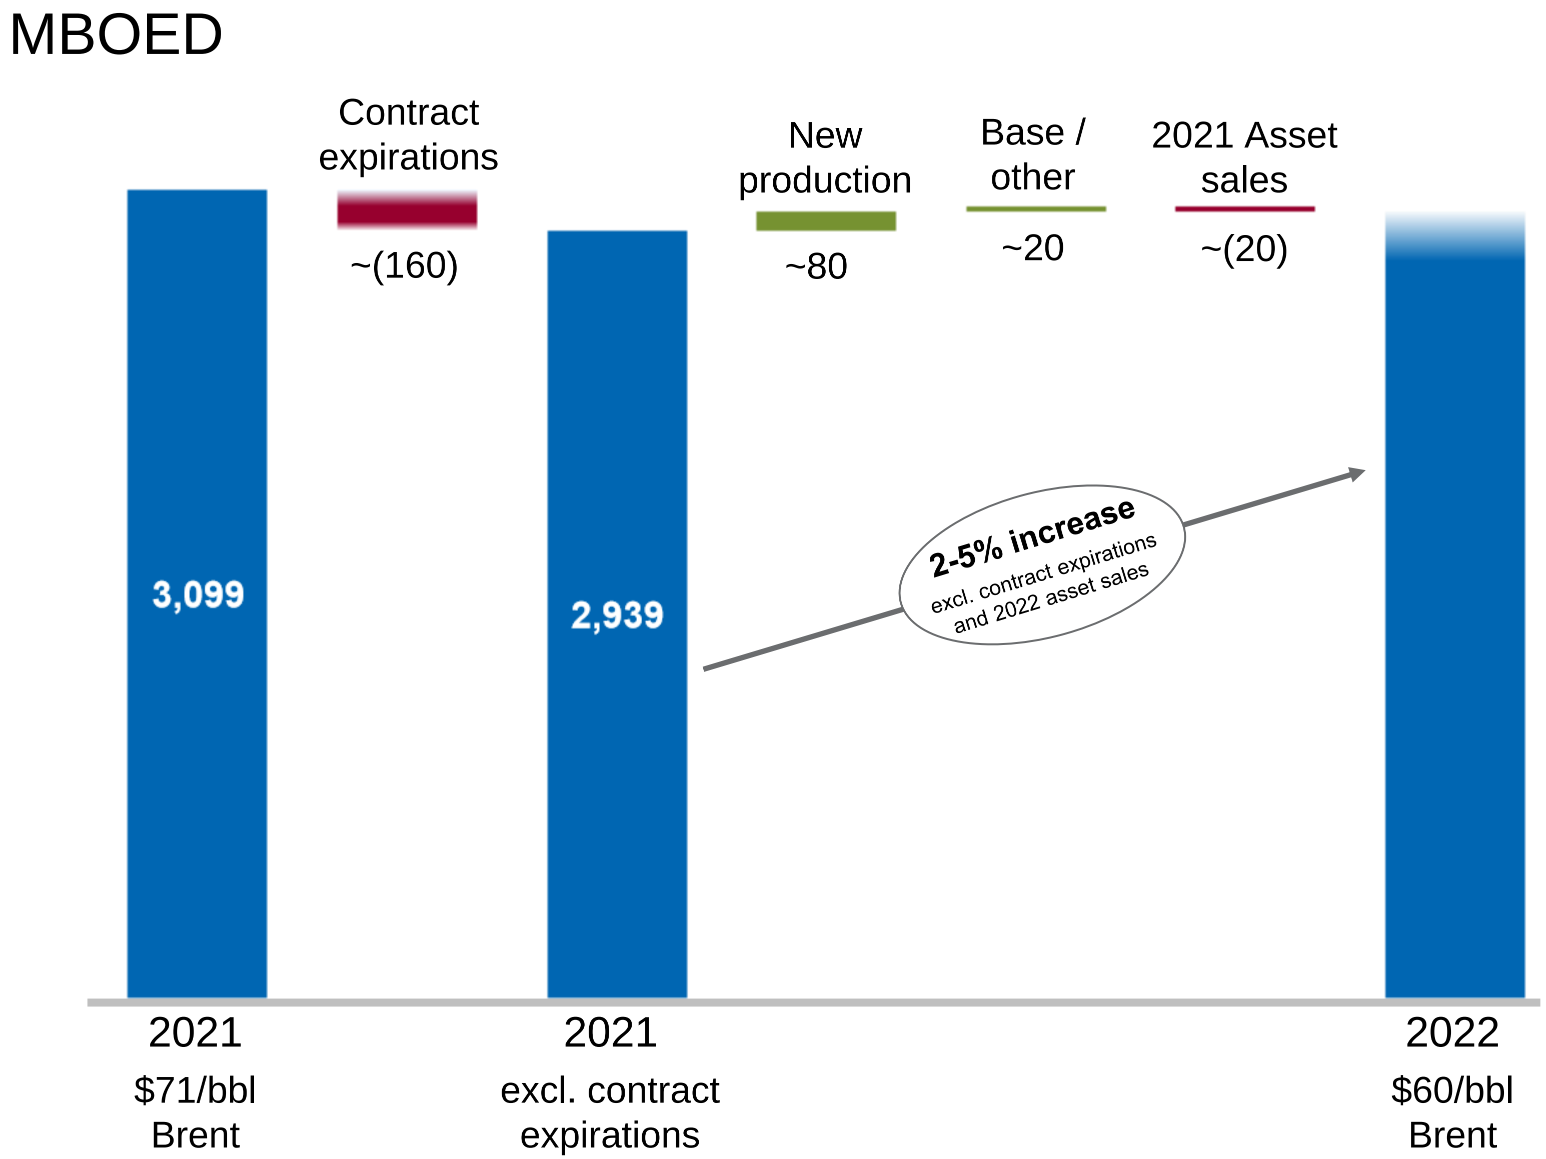




See Appendix for reconciliation of non-GAAP measures and slide notes providing definitions, source information, calculations, and other information.

*2026 Brent is for illustrative purposes only and not necessarily indicative of Chevron's price forecast.

2022 Production outlook



Note: $60/bbl nominal Brent is for illustrative purposes only and not necessarily indicative of Chevron's price forecast.

Indonesia & Thailand contract expirations

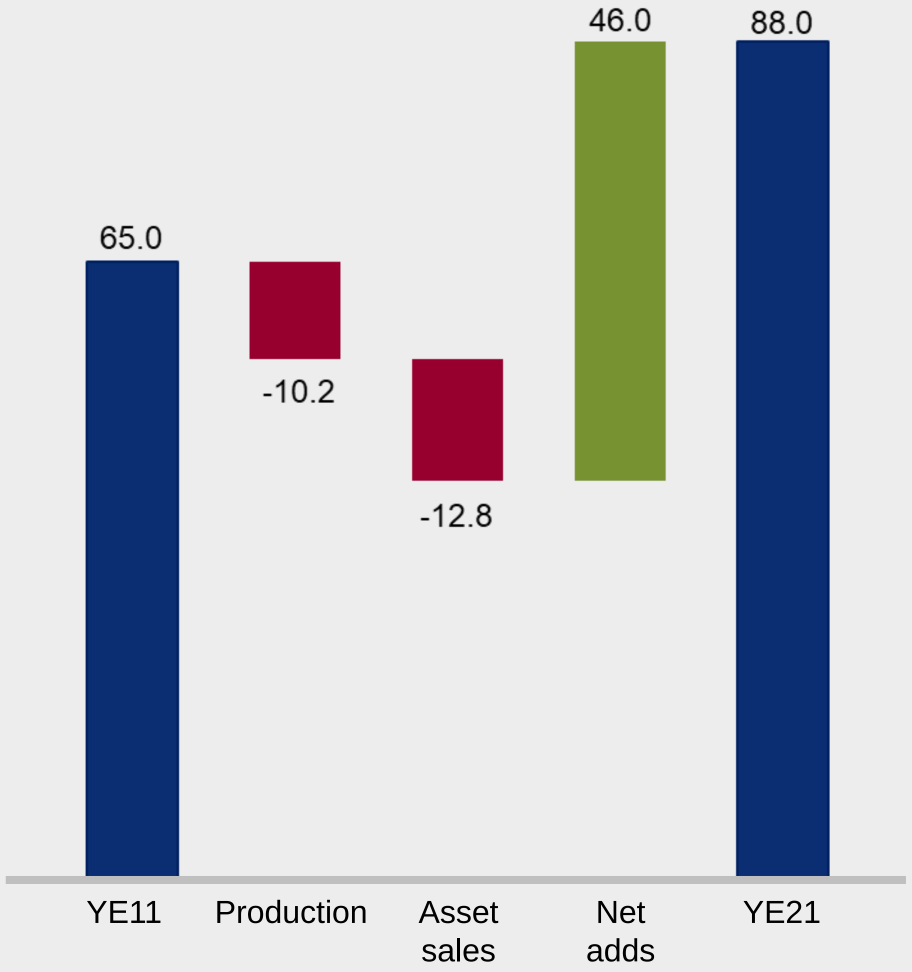
Ramp-up in Permian

Lower turnaround activity

Strong resource base underpins production

Resources

10-year resource replenishment
Total 6P BBOE



Strong resource base

Disciplined investment

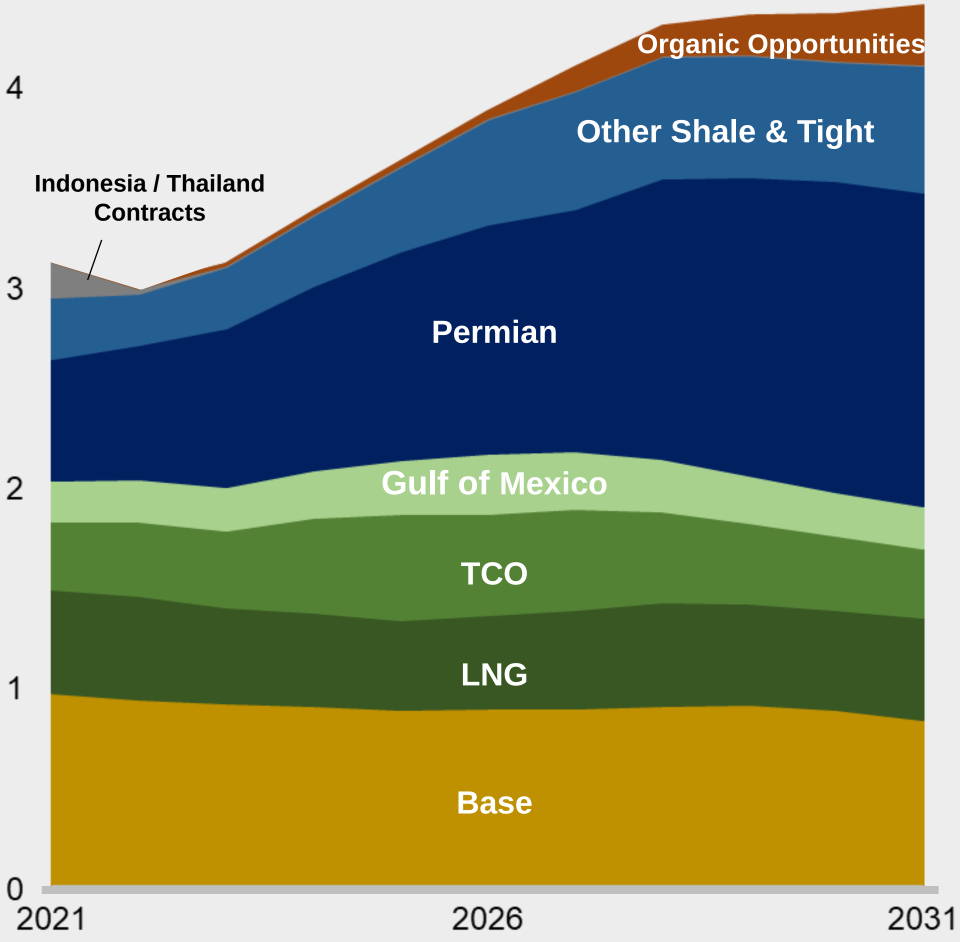
Flexible growth

Financial resilience

Net Production Potential

Excludes impact of potential asset sales

MMBOED



See Appendix for reconciliation of non-GAAP measures and slide notes providing definitions, source information, calculations, and other information.

Historical cumulative 10-year asset sales impact ~200 – 400 MBOED.

Advancing our lower carbon future in Upstream

Carbon Intensity

Upstream scope 1 & 2 emissions

Net zero[1] aspiration

by 2050

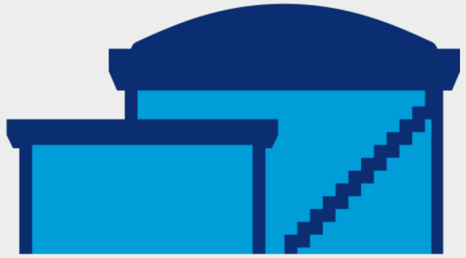
Flaring

Targeting

Zero routine flaring

by 2030

Methane



Methane target

>50% intensity reduction[2]

by 2028

[1] Accomplishing this aspiration depends on continuing progress on commercially viable technology; government policy; successful negotiations for CCS and nature-based projects; availability of cost-effective, verifiable offsets in the global market; and granting of necessary permits by governing authorities.

[2] From 2016 baseline.

Tracking to deliver FGP / WPMP

Project progress

Construction 82% complete

Project 89% complete

Preparing for start-up

Utilities system in start-up

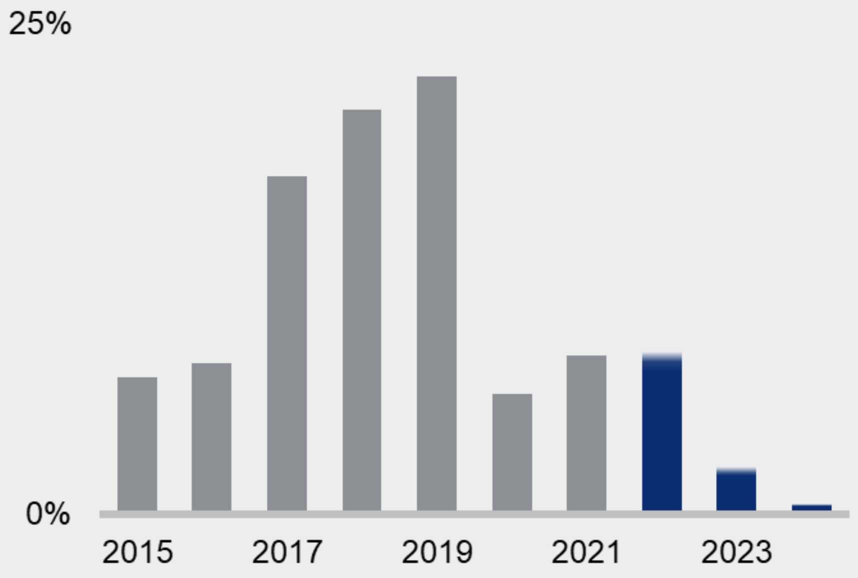
Ramping up systems completion

Expected cash generation

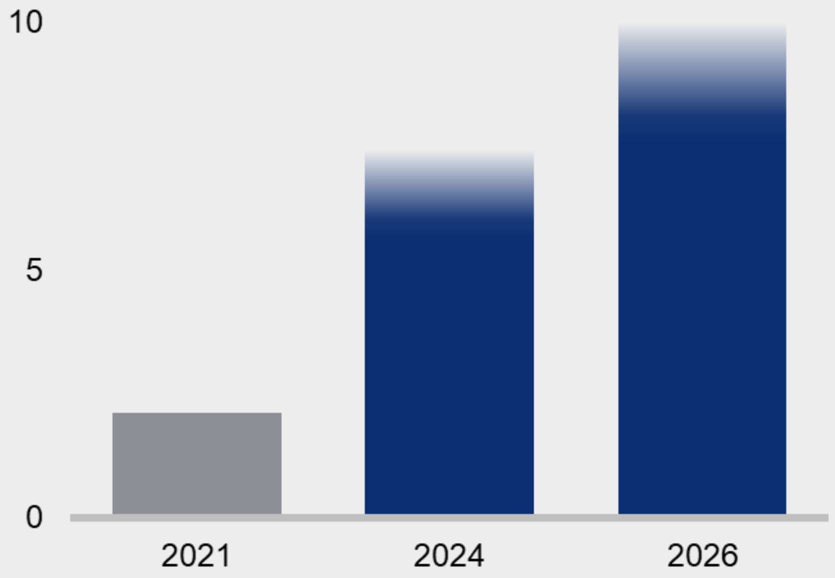
FCF growth ~5x from 2021-26

Loan repayments and higher dividends

Project Progress
Annual %



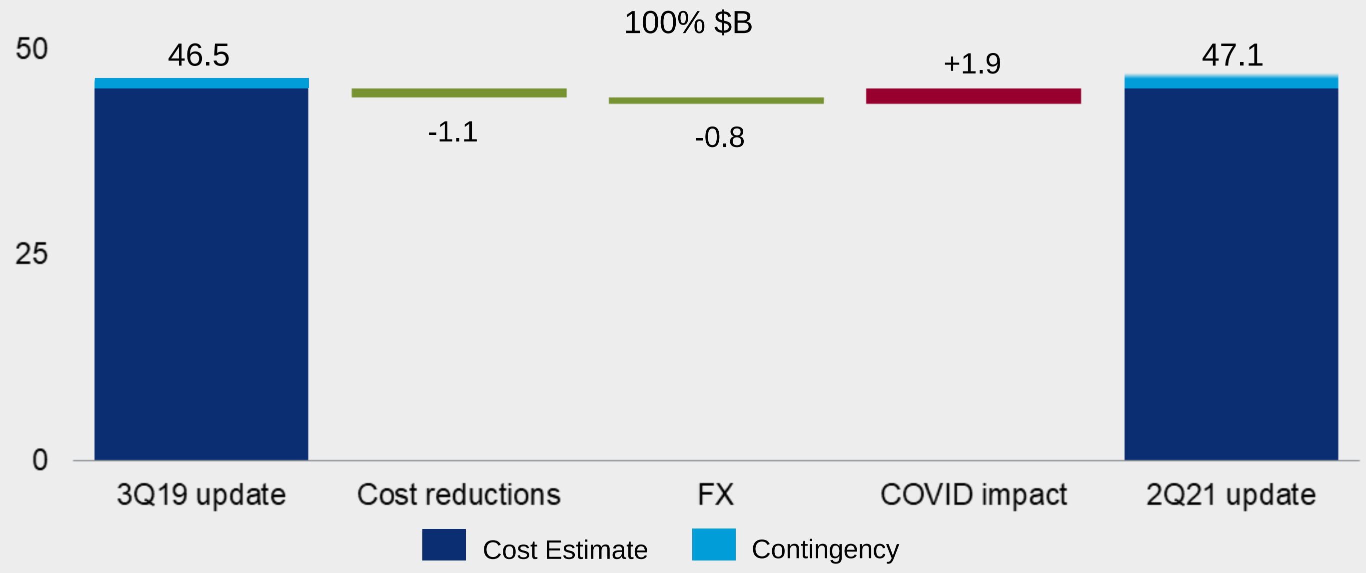
TCO free cash flow
$ billions (100%)



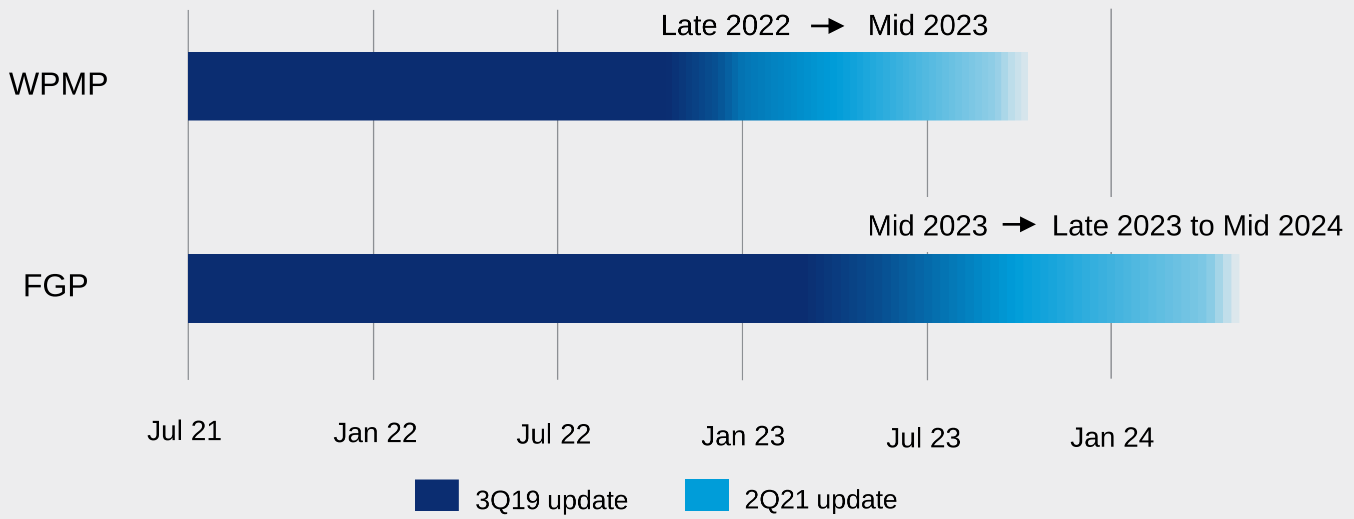
Based on flat $60 /bbl Brent nominal.
This is for illustrative purposes only and not necessarily indicative of Chevron's price forecast.

FGP / WPMP update

Cost outlook



Expected first oil update



Cost target remains $45.2B

Focus on vaccinations, productivity and work sequencing

Note: CVX share of TCO is 50%.

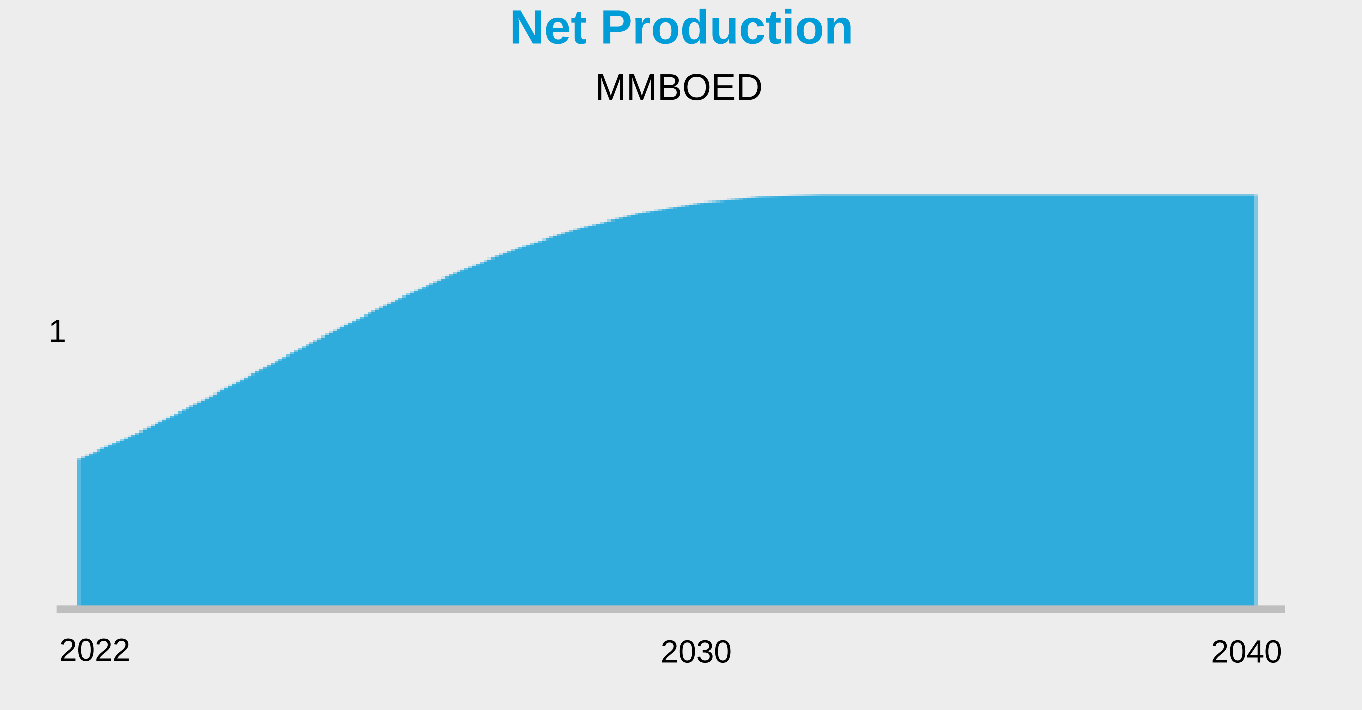
Chevron

Higher returns and free cash flow in Permian

Scale & efficiency outlook

Investment pace ~$4B per year

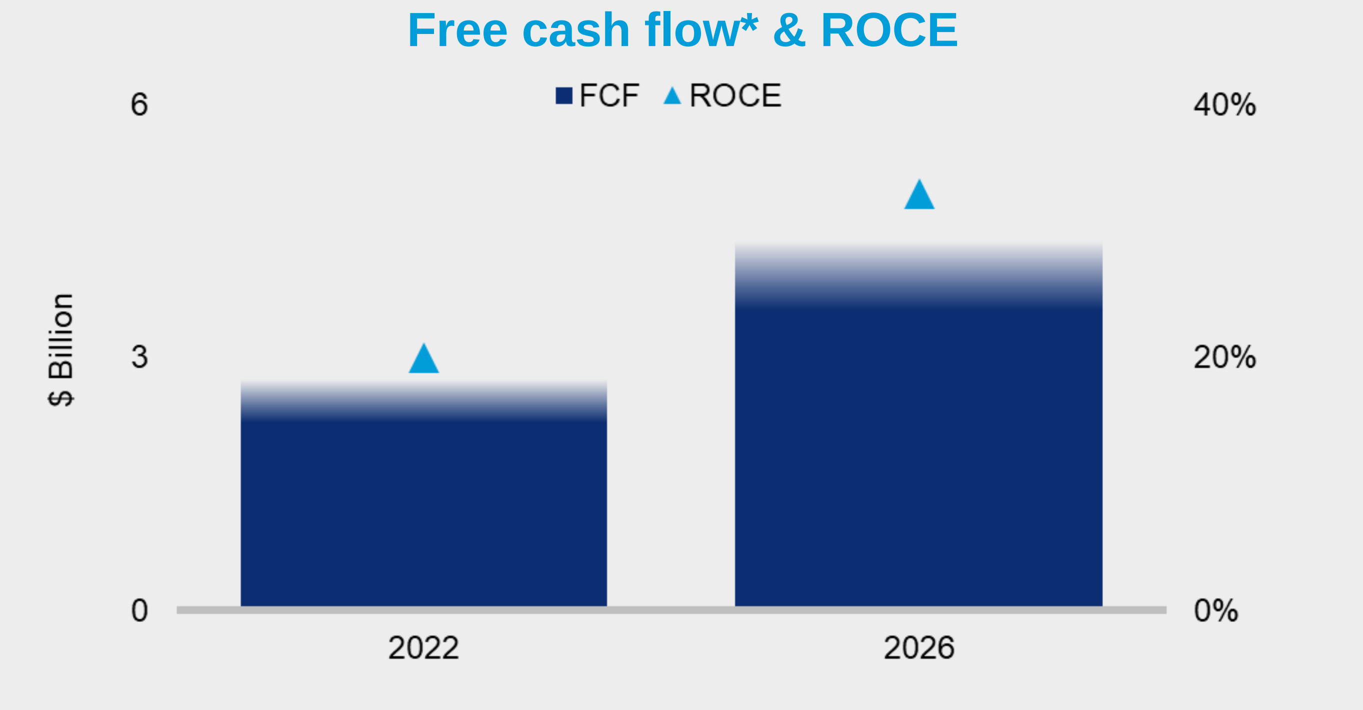
Production grows to 1.2 - 1.5 MMBOED



Expected returns

>$4B FCF in 2026

>30% ROCE in 2026

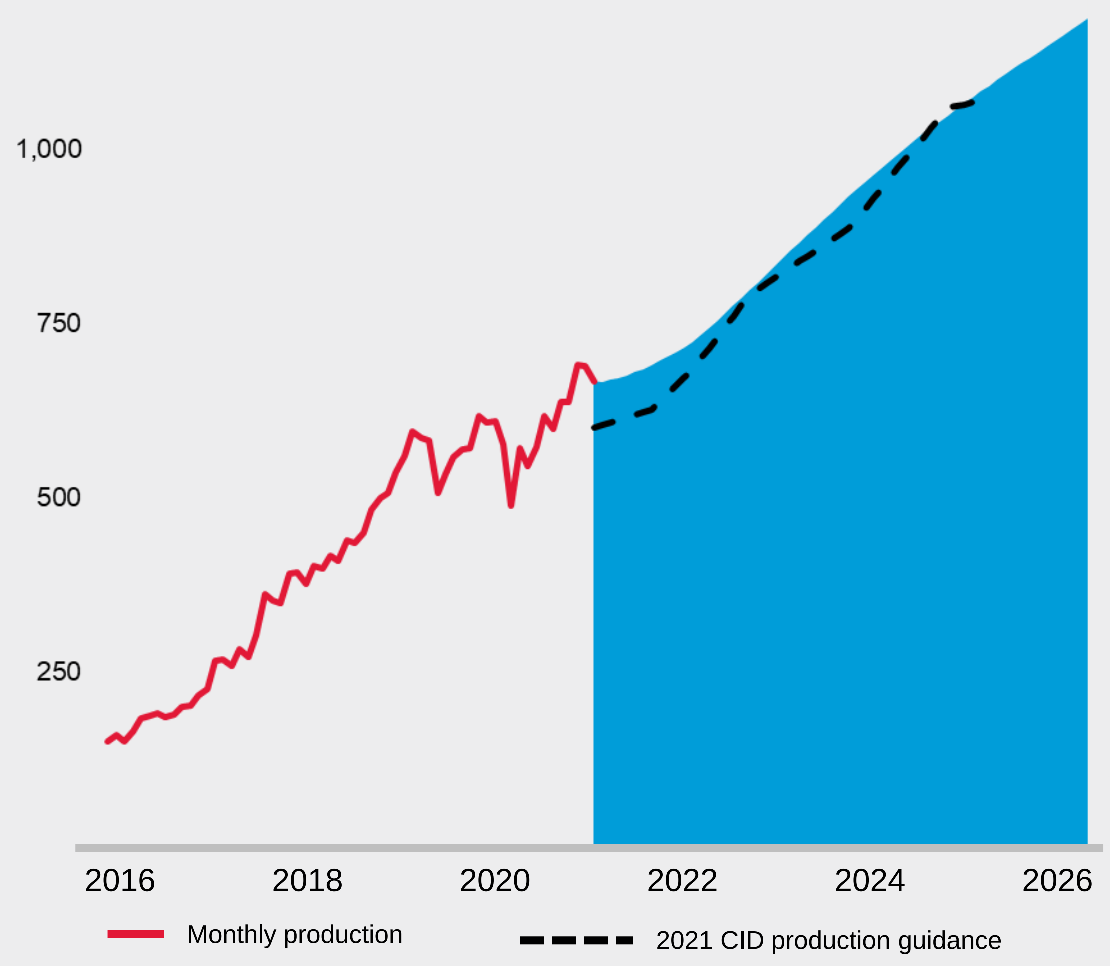


*Excluding working capital
Based on flat $60 /bbl Brent nominal.
This is for illustrative purposes only and not necessarily indicative of Chevron's price forecast.

Production growth in the Permian

Midland and Delaware Basin

Net MBOED



On track for

>1 MMBOED by 2025

Royalty benefit[1] and barrels[2]

~20% of production

[1] Royalty benefit calculation based on Chevron's lower effective royalty rate versus an assumed royalty rate of 25%.
[2] Royalty barrels are received by Chevron from owned acreage that has been leased to others and requires no capital investment.

Expanding the factory model

DJ Basin

Target <$8 / BOE development cost

New facilities ~6 kg CO_2e/BOE*

Vaca Muerta

Target <$7 / BOE development cost

Aerial methane detection

Angola

Target <$10 / BOE development cost

Block 0 GHG reduction

* Projected upstream emission (scope 1 and 2) intensity in kg CO_2e/BOE is BOE-weighted for initial years of production. Actual annual intensity is expected to vary.

Expect growth in the deepwater

Australia

Gorgon Stage 2 first gas 3Q 2022

~6 MMT CO_2 gross stored to date

Gulf of Mexico

>300 MBOED by 2026

Carbon intensity ~6 kg CO_2e/BOE*

MCP start-up dates

2022	2023	2024	Future
Mad Dog 2	St. Malo Injection	Anchor Whale	Ballymore

*Upstream emission intensity scope 1 and 2 in kg CO_2e/BOE.

Corporate appendix

Appendix: slide notes

This presentation is meant to be read in conjunction with the 2022 Chevron Investor Day Transcript posted on chevron.com under the headings "Investors," "Events & Presentations."

Slide 5 – Winning combination

- Quartiles are based on field-level intensity data from IEA, *World Energy Outlook 2018.*

Slide 6 – More capital and cost efficient

- **Annual C&E expenditures –** Historical figures from 2010 through 2019 represent total reported capital and exploratory expenditures. The 2022-26 C&E guidance reflects the company's organic capital budget announced in December 2021.
- **Unit opex –** Defined as the ratio of total operating expense and annual volumes.
  - Total operating expense is the sum of "operating expenses," "selling, general and administrative expenses" and "other components of net periodic benefit costs" line items from Chevron's income statement.
  - Annual volumes are defined as the sum of "Total Consolidated Companies" oil equivalent production and "Total Refined Product Sales" for U.S. and International Downstream, excluding sales of affiliates. Refer to the Net Production of Liquids and Natural Gas table and Selected Operating Data table of Chevron's Form 10-K.
  - In 2021, Chevron's unit opex was ~14.5 $/BOE.
  - Data points across 2010-2019 are exclusive of the Noble acquisition.

Slide 7 – Raising ROCE target

- $60/bbl Brent is for illustrative purposes only and not necessarily indicative of Chevron's price forecast.
- **Adjusted ROCE –** 2021 earnings are normalized to $60 Brent, $3 Henry Hub, $7 international LNG and mid-cycle Downstream & Chemicals margins.
- **CFFO per share excluding working capital –** 2021 cash flow from operations is normalized to $60 Brent, $3 Henry Hub, $7 international LNG and mid-cycle Downstream & Chemicals margins.
- $160 million mid-cycle margin normalization in 2021 is based on 10-15% lower than average 2013-2019 refining margins, assumed 2026 chemical margins and assumed 2026 shipping rates.
- See Appendix for reconciliation of non-GAAP measures.

Slide 9 – Consistent financial priorities

- **Capital efficiency –** Evaluated as the ratio of total reported capital and exploratory expenditures and annual cash flow from operations.
- **Net debt ratio –** Net debt ratio is defined as debt less cash, cash equivalents and marketable securities divided by debt less cash, cash equivalents and marketable securities plus stockholders' equity. All figures are based on published Chevron financial reports. Refer to Chevron's 2021 Form 10-K for reconciliation.

Slide 10 – Downside resilience and upside leverage

- $50/bbl Brent nominal and $75/bbl Brent nominal are for illustrative purposes only and not necessarily indicative of Chevron's price forecast.
- Potential to buyback ~20% of shares outstanding is based on the 30-day CVX average market capitalization as of May 20, 2022.

Upstream & Midstream appendix

Appendix: slide notes

This presentation is meant to be read in conjunction with the 2022 Chevron Investor Day Transcript posted on chevron.com under the headings "Investors," "Events & Presentations."

<u>**Slide 13 – Continuing to advance our Upstream business**</u>

- **Upstream Cash after C&E –** Defined as the sum of earnings A/T, DD&A, asset sale (gain)/loss and exploration expense, less total C&E, per BOE.
  - Earnings A/T is total Upstream earnings including affiliates as represented in Chevron's Form 10-K.
  - DD&A is the sum of depreciation expenses *[Note 16 Property Plant and Equipment]* and Affiliate Companies depreciation & depletion and accretion expense *[Table III – Results of Oil & Gas Producing Activities]* as represented in Chevron's Form 10-K.
  - Asset Sale (Gain)/Loss reflect reported special items in previous investor materials.
  - Exploration expense is the sum of exploration expenses *[Consolidated Statement of Income]* and Affiliate Companies exploration expense *[Table III – Results of Oil & Gas Producing Activities]* as represented in Chevron's Form 10-K.
  - Total C&E is Upstream total capital and exploratory expenditures including affiliates as represented in Chevron's Form 10-K.
  - Barrel of Oil Equivalent (BOE) is annualized from total Upstream production per day as represented in Chevron's Form 10-K.

Downstream & Chemicals appendix

Appendix: slide notes

This presentation is meant to be read in conjunction with the 2022 Chevron Investor Day Transcript posted on chevron.com under the headings “Investors,” “Events & Presentations.”

Slide 26 – Strong demand outlook for our products

- **Global demand forecast** – Source: Wood Mackenzie.
- **Polyethylene demand growth** – Source: Wood Mackenzie.
- ~3% CAGR through 2026 is for global polyethylene demand.

Slide 27 – Improving downstream & chemicals performance

- **ROCE** – Return on capital employed
- $160 million mid-cycle margin normalization in 2021 is based on 10-15% lower than average 2013-2019 refining margins, assumed 2026 chemical margins, and assumed 2026 shipping rates.
- See Appendix for reconciliation of non-GAAP measures.

Slide 28 – Driving self-help

- **Brand trust and fuel quality** – Source: The NPD Group, Inc. / Motor Fuels Index, January - December 2021.
- **Non-turnaround maintenance unit opex** – Unit opex is for U.S. operated refineries; excludes fuel & utilities, materials & supplies, labor, and other opex.
- **Annualized turnaround spend** – Annualized spend is the total cost of a turnaround divided by the interval (number of years) between turnaround events for Solomon units at U.S. operated refineries. Source: Solomon Associates for 2018-2020 data with Chevron data and analysis for 2022-2026.

Slide 29 – Accelerating actions on renewable fuels targets

- **MMBTU/D** – Million British thermal units per day
- **CNG** – Compressed natural gas
- **B/D** – Barrels per day
- **SAF** – Sustainable aviation fuel
- **TPA** – Tonnes per annum
- 60 of the 75 CNG stations are held through Chevron’s equity interest in American Natural Gas LLC (now Beyond6, LLC).

Slide 30 – Attractive petrochemical business

- **Ethylene supply stack** – Source: IHS Markit.
- **CPChem unit opex** – 2024 and 2026 opex includes forecasted 2021-2026 average turnaround expenses in each year.
